LEADER OF THE PACK

**INNOVATIVE HEALTH PRODUCTS FOR DOGS
AND THE PEOPLE WHO LOVE THEM SINCE 1979**

A Lifetime of Good Health

Our customers often tell us, “We just wish we had started on Springtime products earlier!” We certainly take that as a compliment. It’s also good advice. It’s never too soon to think about your dog’s health. Springtime supplements and treats provide natural health support for all stages in the life of a dog — from puppies to seniors!

Springtime News

CELEBRATING 40 YEARS WITH A NEW LOOK!

Since our beginning in 1979, Springtime Supplements has grown and evolved as a company, but our logo has remained mostly unchanged. As we hit “the big 4-0,” we felt the time was right to give the Springtime logo a bit of a facelift, if you will. It was a tough process, but we are proud to present our new logo, which artfully represents our long-standing mission to help our customers in their quest for a happier, more active lifestyle. The lotus flower is the perfect icon, because it symbolizes rebirth, renewal, and revitalization. It is a flower that has the ability to rise out of the darkest of waters to reveal its full beauty and potential. Like the lotus, Springtime is always growing to meet the needs of our customers and their animals, but we remain rooted to our core principles of providing the highest quality health products at a reasonable price and with unparalleled service. Because, as our founder Dennis Hampt has said since the '70s, “People who love animals gotta stick together.”

The Springtime Difference...

At Springtime Supplements, we offer products for joint health, immune support, calming, performance, insect control, and much, much more. But perhaps our most important offering is expertise. Since 1979, we have been dedicated to improving the lives of dogs, horses, and people with our own brand of supplements and a focus on delivering those products with excellent service.

We make all our products in our FDA-inspected facility in Maryland, which gives us the unique ability to offer the highest quality at the best value. We go above and beyond the highest testing standards, to ensure quality, purity, and safety. That's why dog and horse owners, vets, trainers, farriers, farmers, breeders, rescues, and

human and animal athletes alike swear by Springtime Supplements. They choose Springtime because they trust Springtime.

Plus, when you call Springtime, you're always talking to people who love animals and know animals. We're here to listen to your challenges and goals to provide knowledge to help you craft an innovative solution.

Our 40 years in the industry and our complete control over manufacturing give you the best possible products at the lowest cost. Our team has the experience and shared love of animals, which means you always have an expert resource to help you. When passion meets expertise, that's the Springtime difference.

Springtime Joins Forces with Industry Leader

We are proud to announce our membership with the National Animal Supplement Council (NASC)! As promoters of animal health and nutritional supplements for horses, dogs, and people, we find that the NASC is a perfect match for us. Together, we are aligned in our commitment to manufacture and provide quality products for our companion animals, and to continue to raise the bar, as examples to others in the animal health product industry.

Our company is committed to quality, vigilance, and continual improvement to promote the wellbeing of animals everywhere. This designation means, by

choosing Springtime products for your animal, you will continue to have peace of mind, knowing that you are making an informed decision regarding the health of your animal.

Bill Bookout, the President of the National Animal Supplement Council, says of Springtime Supplements: "NASC has established an excellent working relationship with Kevin Edwards, President & CEO of Springtime Supplements. Springtime is a model manufacturer and one of NASC's newest Primary Suppliers. Springtime Supplements continues to be a leader in the animal supplement industry." For more info, visit: <https://nasc.cc/faqs/>

New Label, Same Great Products

In your upcoming orders, you might not recognize your favorite Springtime products because they have a fancy new redesigned label. Some of the verbiage on the label has changed as well, but rest assured that none of our products or formulas have changed. These remain the Springtime products you have loved and trusted for your animals from the beginning. Here are some answers to a few questions you might have.

Why change the labels?

For starters, we updated our logo and branding and couldn't wait to show it off on our product labels. We hope you like the new clean, clear look and feel. By joining the NASC (see above), our product labels were redesigned to meet the NASC standard, and better yet, provide clarity and consistency to the industry we serve.

Why does it look like the ingredients have changed?

Rest assured that none of our formulas or products have changed — only the way we label them has changed. The NASC has specific labeling guidelines as it pertains to the dosage, the order of the ingredients, and how those ingredients are quantified. The NASC also designates products either as a feed supplement (nutrition) or as a dosage form animal health product (addressing a bodily mechanism), and you will see the ingredients listed under either the Guaranteed Analysis or Product Facts, respectively. The ingredients will be presented somewhat differently depending on this designation. We have updated our labels to meet these requirements. For more info, visit: <https://nasc.cc/faqs/> or give us a call at 800-521-3212.

Our newly designed labels for dogs, people, and horses.

Why are there cautions and warnings on the label?

NASC Guidelines require cautions and warnings to be prominently displayed. Cautions inform of you of any special considerations regarding your animals. This could be information regarding pregnant or nursing animals or helpful instructions to avoid common mistakes or issues. Warnings are the same thing, but these are considerations for human safety. These statements are for you and your family to be mindful of when animal products are in your home.

Five Simple Ways to Evaluate Dog Health

A few tips to help you identify issues before they become big problems.

1) Weight

Is your pet carrying too much weight? Leaner pets tend to be healthier and have fewer diseases. However, obesity can lead to diseases such as diabetes, arthritis, and heart conditions among others. In addition, that added weight could be aggravating already sore joints and potentially causing further damage. If your dog is too large to weigh at home, most veterinarians will allow clients to come in and check their pets' weight without an appointment or fee.

2) Body Condition

Does your pet have a waist? Most people don't think about it, but your pet should have an hourglass figure. Stand over your dog and look down. If your dog's waist doesn't narrow at least a little bit before the hips, he or she may be carrying extra pounds. Now we look at the pet from the side: Does his or her belly start to tuck behind the rib cage? You should be able to feel, but not see, your pet's ribs. If your beloved furry friend is barrel-shaped, then it might be time to reduce your dog's caloric intake. Please remember: You're the one in control of filling the food bowl, and your pet is only in control of emptying it.

3) Ears

As you look into your pet's ears, they should be clean and pale pink (or skin colored depending on breed and coat color). There should be no brown, black, or waxy build-up. The ears should also be odor-free. Chronic ear goo could be another sign of allergies, and you may want to consider upgrading the diet or adding a supplement containing natural support for a healthy allergic response, such as bee pollen or spirulina (**Longevity**, **Fresh Factors**, etc.).

4) Skin Appearance & Itching

Itchy skin can be caused by a variety of factors. The first step is to ensure that your pet does not have fleas. By using a simple flea comb and running it through your dog's fur, you can check for fleas or "flea dirt." It's important to get the comb down to the skin as you brush it through, checking for tiny fleas or bits of black flea dirt. If you find either of these, you can use **Diatomaceous Earth** to rid your dog of fleas naturally, as well as any infested areas, such as bedding, couches, carpets, etc. Once the infestation is resolved, you can prevent future flea attacks with daily **Bug Off Garlic**.

If you don't find any evidence of fleas, it is possible your pet is suffering from allergies or simply dry skin. When you part your pet's fur and examine the skin underneath, the skin should be relatively pink (or comparable color, depending on coat color) and even-toned without any redness, bumps, flakes, or patches of moisture. You can take a good sniff while you're at the skin level. Does it smell like "dog" or do you smell a yeasty or infection-type smell? These are further signs of allergies, and you might want to evaluate your pet's diet and perhaps consider upgrading.

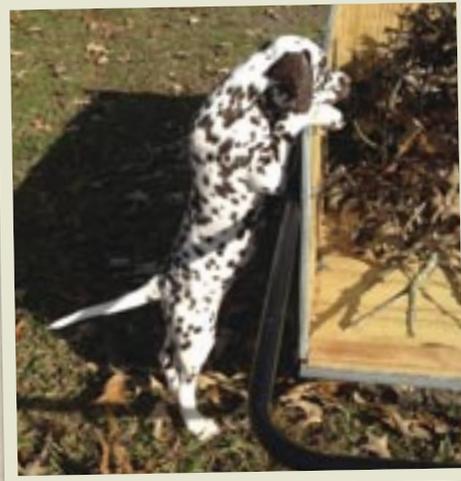

A healthy allergic response can be supported by adding either **Fresh Factors** or **Longevity** to your pet's meals. When fed daily, the nutrients in these two products nourish healthy skin. For healthy itch-free skin, consider adding **Omega 3-6-9** or **Skin & Coat Oil** to the diet. Watch as the your pet's coat shines with a healthy luster. Let's think of it like this: Someone who eats fast-food hamburgers and fries every day isn't going to have perfect skin and hair, but if they improve their diet, their acne and greasy hair will clear up.

5) Stool Appearance

Stool appearance and consistency are important signs of your pet's overall health. Your pet's stools should be solid and formed but not hard. Coloring will vary depending on what is being fed (if a variety goes in, a variety will come out). You do not want overly soft stools. Also keep an eye open for parasites. Regular stool sample checks by your veterinarian will ensure your pet remains worm-free.

GREAT FOR PUPPIES TOO!

"I just wanted to let you know that this very special spotted baby has been on Longevity since she started eating dry. She just turned 6 months."

Karen West, Georgia
(using Springtime supplements for 15 years)

The West's new puppy Toffee (left).

"We start our pups on a regimen of Joint Health Chewables at 4 months. Like all of our dogs, our puppies also get Fresh Factors. Our veterinarian is always amazed at how healthy the pups are, and also that they never seem to get the skin and coat issues that many puppies typically get."

Roberta Spicer & Stephanie K. Martucci,
Shadyside Labradors/Bachman Mill Labradors, Maryland

These adorable Black Labs get Joint Health Chewables and Fresh Factors.

The Vahey girls can cuddle Dallas & Max without worrying about chemicals.

"We live in a densely wooded area, in one of the worst places for Lyme Disease in Maryland. Since we rescued Dallas and Max at 8 weeks, Bug Off Garlic has kept them tick-free. Plus, the vet says their bloodwork is perfect."

Kelly Vahey, Maryland

Fresh Factors

Springtime's original chewable. Support healthy joints, coat, and digestion with the power of chondroitin sulfate, bee pollen, yeast culture, kelp, biotin, and beef liver.

Dog owners love to talk to one another about their dogs. The result has been a groundswell of friend referrals that over the years has made **Fresh Factors** their overwhelming choice for a convenient, great tasting supplement that keeps everybody happy and healthy.

PRODUCT HIGHLIGHTS

- Great for all ages, including puppies
- Helps maintain healthy joints & hips
- Helps support itch-free skin
- Supports digestion & reduces stool size
- Supports healthy immune system
- Nourishes coat & skin, muscle tone
- Palatable for dogs on all diets
- Excellent in combination with **Joint Health Chews**

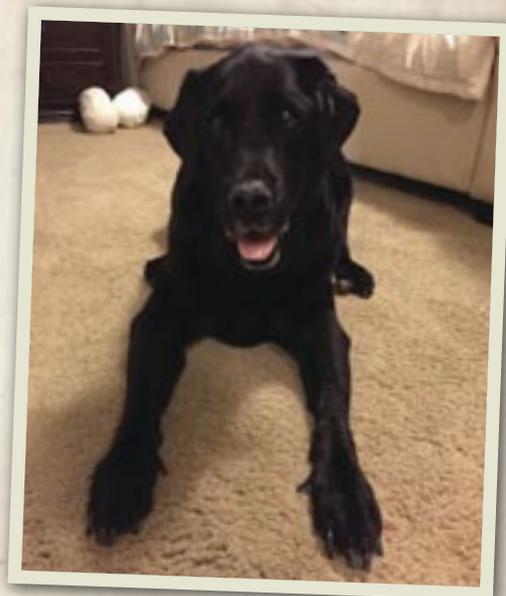

Fresh Factors Helped Duke Beat the Odds

Dear Springtime:

At 6 months of age, my black Labrador, Duke, was given three years to live. He suffered from severe joint issues. After much success with administering **Fresh Factors** to my mom's Lab & Golden Retriever, I decided to try it out on Duke. We lost my boy last month at age 13. He far exceeded the initial estimate and lived a long, happy, healthy life starting off every day of his life with **Fresh Factors**. My whole family has witnessed the success of this product and swears by it. Thank you for giving me an additional 10 years of happiness with my best friend.

Vicki Norman, California

Duke lived a decade beyond his vet's prognosis

Real Letters from Real People

Springtime Works Wonders for Wildlife...

I am one of the Animal Caretakers here at the Yellowstone Wildlife Sanctuary in Red Lodge, Montana, and we have been using some of your products for over a year now. We currently have two Coyotes, two Red Foxes, and one Grey Wolf and all of them are on **Fresh Factors**. Apache, our Grey Wolf, receives the **Fresh Factors** along with the **Advanced Hip & Joint Chewables** every day with her meal. Thanks! The wildlife surely does appreciate it.

Kara Chester, Yellowstone Wildlife Sanctuary, Montana

Bonnie the Coyote

Apache the Grey Wolf

Rex the Red Fox

Nanner and Ghillie have been raised on **Fresh Factors** for seven and five years respectively. They LOVE their morning "treats."

~Sara Kirkwood, Oregon

13½ Year Old has "...more energy than a two year old."

Dear Springtime:

Just wanted to tell you how much we LOVE **Fresh Factors**! We started using them several years ago with an older dog that had been retired from competitive events because he was showing his age, and just didn't seem to be feeling up to it. After a couple weeks of **Fresh Factors**, he really perked up and was able to go back to training and competing! It was amazing, the difference it made.

We are currently giving **Fresh Factors** to my 13½ year old Border Collie, Rev, who now has more energy than a two year old. I can definitely tell a difference if he misses getting his **Fresh Factors**.

We recommend them to a lot of our clients as well. The remarkable effect **Fresh Factors** has had on several of our dogs has made me want to try them myself!

Lori Herbel, XP Ranch, Oklahoma

How Love (and Fresh Factors) Saved an Amazing Dog

Dear Springtime:

I have a rescue Pitbull/Boxer mix that I got when he was only 4 weeks old and on death's door. The woman that I got him from was headed for the dumpster with this puppy in a box, saying he wasn't worth the time anyway. I couldn't let this happen, obviously, so I scooped him up and did my best to save his life that he hadn't even begun to live yet.

I work in my local animal rescue as a foster coordinator, so working with sick puppies is nothing out of the norm for me. I started treating this puppy for his severe parasite infestation, muscle development issues, and skeletal problems. We almost lost him many times. My plan was to get him better and then find him a forever home through the rescue I work at, but he took so much work to keep alive that he ended up winning us over with his amazing spirit, infectious smile, and will to live! We named him Banks.

Banks is one lucky dog!

“To my amazement, I discovered Banks has a beautiful dark brindle coat, something I didn't know, because his coat was in such bad shape when we first got him.”

When I first started treating Banks, he had internal issues that were so bad that he had very thin, patchy hair, he could hardly walk, and his belly was so very bloated. Since the worms were taking all of his much needed nutrients, Banks suffered from many problems. I decided I had to give him some sort of supplement in addition to the food he was on to really set him up for success.

I started feeding Banks your **Fresh Factors** when he turned about 6 weeks old and could finally eat solid food. I started with the maximum dose, because I knew he needed anything he could get to help him. In just two weeks, I couldn't believe the improvement! His hair started growing back, and he finally started gaining appropriate weight and muscle mass — no more rounded belly! To my amazement, I discovered Banks has a beautiful dark brindle coat, something I didn't know, because his coat was in such bad shape when we first got him. He now had energy like never before and was finally starting to act like a real puppy. I cried tears of joy.

At about 3 months old, he was being his new-and-improved self and running around, like any farm puppy, having the time of his life. Being a tenacious, strong-willed pup, Banks started chasing the horse and donkeys we have on the property. Somewhere in the midst of this chaos, he was trampled by one of the equines, injuring his shoulder. I was so angry and worried for him. We had just gotten him to be a normal puppy and there he goes getting himself trampled! Thankfully, he had no severe bone breaks, but he now walked with a limp. After all the work I put into him, I could not stand for him to be limping for the rest of his life. Enter **Joint Health Chewables**. Again, two weeks of the maximum dose and he was back to his normal self! I was in awe.

Now, Banks is 3 years old and gets 2 **Fresh Factors** and 2 **Joint Health Chewables** daily. He adores both, which is amazing, because he is NOT a fan of most treats. He goes on hikes with me with no limping, and his coat has never looked better. Banks has never been healthier! He never gets sick, and everyone comments on how his coat is so soft and shiny and how his feet seem to be attached to springs!

I can't thank **Springtime** enough. I honestly believe your **Fresh Factors** and **Joint Health Chewables** had a huge part in how my pup's life turned out. All of my animals are now on **Springtime** supplements, from Roman, an 8-year-old Mastiff, to Abby, a 20-year-old Appaloosa that has heaves. I recommend them to anyone that will listen!

Thank you for all you do.

Jill and “Banks” Chubbuck, Washington

Customer Corner: Joint Health Chewables

Real Letters from Real People

"I ... saw a profound change with her within only two weeks."

Dear Springtime:

I wanted to write to you and thank you for the years of support that your product, **Joint Health Chewables**, gave my beloved German Shepherd Hilda. Hilda developed joint issues around the age of two years old. After much research, I ordered Hilda **Joint Health Chewables** and saw a profound change with her within only two weeks. She was able to run again, climb stairs (she didn't even want to go up one step before starting her on the product), enjoyed swimming daily, and lived a good, healthy life.

I kept Hilda on the **Joint Health Chewables** supplements for the remaining seven years of her life. I truly believe that without your product, Hilda would not have had the quality of life she did. This product made such a difference in Hilda, and I have recommended your products to every pet owner I know.

I don't know how to thank you.

Sincerely,

Nancy Davis, Michigan

Three Cheers for Joint Health Chews!

Joey is able to clap again!

Dear Springtime:

I was so pleased when we received Joey's **Joint Health Chewables**. This product came highly recommended by our neighbor as I watched his 9-year-old Golden Retriever do the "zoomies" round and round their front yard.

Our 7-year-old Bernese Mountain Dog Joey (a.k.a. Scrumptious) was having a lot of trouble getting up from a laying position. So I doubled his dosage as you suggested. I am actually seeing improvement in just three days!

Joey has been clapping since he was 11 months (yes, he actually sits and claps). Since about 3 months ago, he has been unable to clap for me. Yesterday, I asked him to clap, and without hesitation he did three perfect claps! I got tears of joy!

I am so thrilled, because if he is feeling this much better in just three days, maybe my Scrumptious will soon be doing the zoomies around the yard like our neighbor's dog.

With warm regards,

Maria Brisgel, California

“...he just kept getting better and better!”

Dear Springtime:

Hugo is my 6-year-old, 125-lb American Bulldog. At 4 years old, he injured his knee in the dog park. I took him to the vet where he was x-rayed and put on a strong medication. The vet recommended a \$3,000.00 operation with no guarantees. Huh? What does that mean? It means that he may have to stay on the drugs after the operation for a long peri-

“And now, and for a very long time, he’s been just fine.”

od of time. Wow! I was in shock. This dog was hobbled, couldn’t walk, and wouldn’t eat. I wasn’t sure what I should do. The price of the operation, the ongoing drugs, the liver tests, the post-operative care for a dog of that size — I even had thoughts of putting him down! It was very sad.

I declined the operation, used up the medication I had, and took it real easy for a while. Then I started your **Springtime** products! Day after day, week after week, he just kept getting better and better! And now, and for a very long time, he’s been just fine!

He runs around, goes for long walks, jumps up on the couch, and rolls on his back, kicking all four legs in the air. He does everything a dog should be doing! His fur is so soft, and he never scratches or chews himself! Everything seems to work so well together. We give him the **Fresh Factors** and **Joint Health**

Hugo goes for long walks now!

Chewables (Combo) and **Omega 3-6-9** pretty much every day. We also give him the **Bug Off Garlic** chews – great stuff! No fleas or ticks! We will give him the **Advanced Hip & Joint Chewables** every once in a while. We just started him on the **Spirulina Chewables*** for general wellness and that seems to work great as well.

It has been almost two years now and my dog is very happy and healthy. I’m a believer! Thank you so much!

Tom Salerno, Rhode Island

**formerly Spirulina Wafers*

15-Year-Old Dog Continues to Amaze Vet

Dear Springtime:

Just wanted to tell you that my vet marvels at how healthy and active my 15 year-old dog is. I got Puffy from a rescue when he was 8 years old. I immediately started him on **Fresh Factors** and **Joint Health Chewables** (I had also used those products on previous dogs) and the results of his annual physical actually improved the following year.

Donna Phillips, Vermont

Puffy seems to get younger with age!

Combo - Fresh Factors & Joint Health Chewables

An economical combination of two of our most popular supplements for dogs.

BUY TWO
GET TWO FREE
SAVE 50%

Combining **Fresh Factors** and **Joint Health Chewables** gives dogs a powerful one-two punch for life-long health. They get **Fresh Factors** for supporting healthy coat and digestion, plus **Joint Health Chewables** to keep their joints lubricated, flexible, and healthy. Using them together works great.

PRODUCT HIGHLIGHTS

- Helps build & maintain strong joints and hips
- Supports healthy tendons & ligaments, elasticity
- Great for all ages, including puppies
- Supports digestion & immune health
- Nourishes coat and skin, muscle tone
- Promotes a mobile lifestyle
- Highly palatable

Combo Solves a Combo of Problems

Dear Springtime:

I ordered your **Fresh Factors** and **Joint Health Chewables** (**the Combo**) for our 11-year-old greyhound, Bella, whom we have had for 6 years. She was on another supplement previously, and it wasn't making much of a difference. Now Bella has more energy and is obviously feeling better. Even our regular dog-sitter asked what had changed because she was much more bouncy and energetic.

We recently brought home a second greyhound, Kirby, who came to us with red, scabby patches on his chest and thighs and dry skin. In less than 2 weeks after starting **Fresh Factors**, Kirby's skin has completely healed and he has stopped scratching at himself constantly. We are hooked!

Sara Davis, Connecticut

Amount may be doubled or tripled if faster, more dramatic benefits are desired. Larger amounts are recommended for older dogs.

PRODUCT FACTS

Active Ingredients per 1 Fresh Factors tablet (2.15 g) and 1 Joint Health Chewable tablet (2.28 g):

Chondroitin Sulfate (Bovine Source)	383 mg
Active Dry Yeast	350 mg
Methylsulfonylmethane (MSM)	300 mg
Glucosamine HCl (Shellfish Source)	250 mg
Bee Pollen	215 mg
Ascorbic Acid (Vitamin C)	125 mg
Kelp	90 mg
Hesperidin	43 mg
Citrus Bioflavonoid	40 mg
Rutin (Vitamin P)	830 mcg
Biotin	700 mcg

Inactive ingredients: Carrot powder, desiccated beef liver, dextrose, microcrystalline cellulose, and stearic acid.

Advanced Hip & Joint Chewables

Chewable tablets with chondroitin sulfate, MSM, and glucosamine HCl for healthy joint support, and boswellia for comfort & mobility.

When your dog says “ouch,” **Springtime Advanced Hip & Joint Chewables** are the answer. Boswellia extract is especially good for maintaining comfort and mobility associated with aging or post-exercise recovery. Combined with a generous dose of chondroitin sulfate and other high-grade ingredients, such as MSM and glucosamine, for overall joint health.

PRODUCT HIGHLIGHTS

- Keeps healthy dogs active
- Supports cartilage health
- Promotes comfort and mobility
- Support for joint stiffness after athletic activity & competition
- Natural way to maintain joint lubrication
- Chewable tablets, flavored with real beef liver
- For the powder version of this product, check out our **Joint Health Formula**

Significant Effect on Discomfort

Dear Springtime:

My neighbor, a well-regarded dog breeder, has been using your products for her dogs for years. I never purchased any for my dog Poppy, until this year when she turned 12 and started to show signs of physical wear. She went from running and playing to just lying on the couch.

I started her on **Fresh Factors** and **Longevity**, but the boswellia in **Advanced Hip & Joint Chewables** seems to have the most significant effect on any problems she has endured because of her aging joints. She is

happy and seems to run more easily. She can now jump up and down without the "oof" she was making before she started the **Advanced Hip & Joint**. She's smiling more, and she's more playful, even playing with the cat while she grins.

I am not a vet. I am not a medical expert. I am not a breeder. But I know this: I love my dog, and now she feels better. My beloved Poppy is happy! Thank you.

Patty Kimura, Massachusetts

Customer Corner: Advanced Hip & Joint Real Letters from Real People

“...he’s up running and playing again!”

Dear Springtime:

I just wanted to say your company is the greatest! I have a golden Lab who is 9 years old. He was starting to develop hip and joint problems and a friend of mine referred me to your company. He was on the **Advanced Hip & Joint Chewables** for less than two weeks and I could tell a huge difference in him! I used to take him for a walk every night but before the **Advanced Hip & Joint Chewables** he really wasn't interested. Now he's up running around and playing again!

“He was on the Advanced Hip & Joint Chewables
for less than two weeks and
I could tell a huge difference in him!”

He also developed allergies where he was constantly licking! After reading the side effects of the medication he used before, I didn't want to give it to him again! I chose to use your supplements and he has quit licking his paws! In addition to **Advanced Hip & Joint Chewables**, he is now on **Fresh Factors** and **Longevity**. I would like to say thank you!

Dena Connors, Missouri

“...much better...”

Angeline's Pug is feeling fine!

Dear Springtime:

My Pug is so much more active after taking **Advanced Hip & Joint Chewables** and **Fresh Factors**. She is doing much better and her condition has not worsened.

“My Pug is so much more active
after taking Advanced Hip & Joint
Chewables and Fresh Factors.”

My little girl, Moon, and I thank you for your wonderful products for our fine furry friends!

Sincerely,

Angeline Marushin, Nevada

Kasha Is Like a Puppy Again!

Dear Springtime:

Our 6½-year-old German Shepherd, Kasha, had stiffness in her legs and back. I found your **Advanced Hip & Joint Chewables** and started giving them to her immediately.

Within one week, she was acting like the little puppy she was before. She is back to playing ball three times a day. We love that this product is natural and works so well on her. Thank you so much for giving us back our sweet little girl with her energy and spirit.

Sincerely yours,

Judith L. Fenicle, Pennsylvania

Kasha is ready to play!

Miracle Recovery

Dear Springtime:

We use **Advanced Hip & Joint Chewables**. I have a 14-year-old Jack Russell named Pearl that was having trouble getting up and down and walking. She has had many accidents in life; she was run over once (in my driveway), dogs have jumped on her, she has jumped out of a barn because of yellow

“She even runs up the steps going in my front door!”

jackets, and horses have stepped on her. Needless to say, in old age, it has caught up with her.

I thought I would try your product on her, and now I feel bad that I haven't had her on it for years. She is now back to running again, and I have had to chase her a couple of times like the old days! She even runs up the steps going in my front door! It is an amazing product, and I just wanted to let you

Jackie and 14-year-old Pearl.

know I will be ordering another bottle when this is about to run out. Thank you so much for making such a great product. Pearl thanks you, too!

Jackie Cooper, Tennessee

BOSWELLIA SERRATA

Treasured since biblical times for its potent health properties.

Boswellia (also known as frankincense) is an herbal supplement with potent health properties made from the resin of the boswellia serrata tree. For thousands of years, boswellia has been prized for its health properties, including support of a healthy inflammatory response.

Studies have shown that boswellic acid supports a normal inflammatory response by blocking the enzyme 5-lipoxygenase which then inhibits the synthesis of leukotrienes. It has also been shown to support healthy cartilage.

Animal Study

In Switzerland in 2004, a veterinary clinical trial was conducted comparing joint health before and after ingestion of extract of boswellia serrata. The extract was given once a day with food at 400mg/10kg of body weight for six weeks. After just two weeks,

researchers noted that 71% of the dogs showed improvement. By week six, significant positive changes were shown in mobility and comfort. A few dogs had brief, reversible episodes of loose stools.

“By week six, significant positive changes were shown in mobility and comfort.”

(From Dietary support with Boswellia resin in canine inflammatory joint and spinal disease. Reichling J, Schmokel H, Fitz J, Bucher S, Saller R. Web. 5 December 2010, PMID: 14994484.)

Sap from the Boswellia serrata tree has been used for thousands of years by traditional herbalists.

THE JOINT MOLECULE: CHONDROITIN SULFATE

The body naturally produces a molecule called chondroitin for the formation and maintenance of joints. The good news is that it can be supplemented to support joint health and comfort.

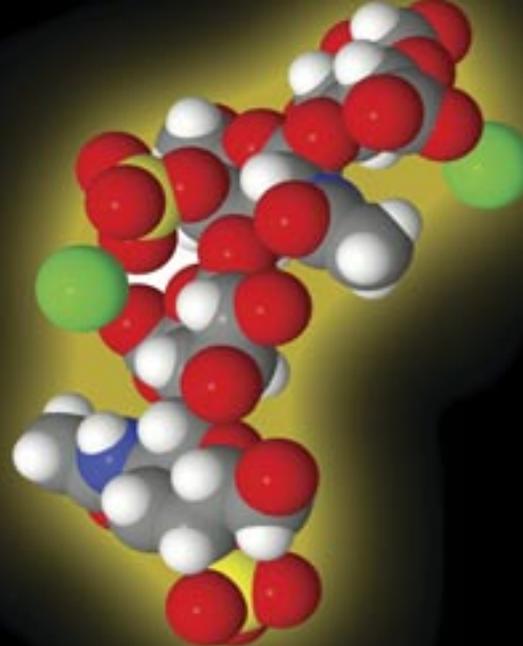

Illustration of a chondroitin sulfate molecule

Chondroitin sulfate is a naturally occurring molecule found in the cartilage and connective tissues of people and animals. Chondroitin is the substance that enables cartilage to provide cushion to healthy joints, and it is what the body uses to make new cartilage. Chondroitin also serves a vital role in the maintenance of healthy skin/coat. Chondroitin can be taken as a supplement to maintain healthy cartilage, joint lubrication, and healthy skin, nails, and hair.

Not all chondroitin is created equal

The chondroitin used in dietary supplements is extracted from the cartilage and connective tissues of animals. The most common animal sources are cow, pig, chicken, and shark. Chondroitin varies depending on the source, and scientists have separated it

into three distinct classes: A, B, and C. This is important because chondroitin A has greater health benefits than B or C, and some animal sources have more chondroitin A than others. For instance, chondroitin sulfate sourced from beef trachea cartilage (used by Springtime) has among the highest concentrations of chondroitin A. Conversely, some products on the market are labeled as 100% chondroitin but contain little to no chondroitin A, rendering them woefully ineffective.

Chondroitin sulfate is one of six related substances called glycosaminoglycans (GAGs), which are also referred to as mucopolysaccharides. Adequate amounts of chondroitin are vital for normal joint function and maintenance as well as many other self-healing mechanisms.

Mr. Dickens, still spry for 22.

22-Year-Old Cat Going On Strong!

Dear Springtime:

Mr. Dickens adopted us 22 years ago. He has outlived both his original master and his adopted master who lived to age 80. He has an annual checkup, teeth get cleaned every few years – no cavities, no extractions ever. ...and while he is a bit slow he has no problem jumping up on the window bench for his breakfast and dinner – breakfast is supplemented with **J-Flex Concentrate**. At the rate he is going, he may well outlast me...

Thanks for carrying this product.

Pat Beauvais, Arizona

Joint Health Formula

Support for a 9/11 Hero...

Dear Springtime:

Tsunami will be 11 years old in March. Isn't she a beauty? Her first mission after Search and Rescue certification was the World Trade Center in New York City — she never flinched and attacked the job like a pro. We still do little searches because she loves it.

She has joint issues in her left elbow from Lyme disease, but the **Joint Health Formula** supports her fluidity and mobility.

Semper Fido,

Marilyn Wilson, New York

Longevity

Powerful blend, including chondroitin, MSM, glucosamine HCl, spirulina, and bee pollen, in a powder formula, to support multiple needs.

**BUY TWO
GET ONE FREE
SAVE 33%**

Longevity is the most comprehensive product we have for dogs at all life stages. **Longevity** helps to support growing puppies as well as aging seniors. The live enzymes, vitamins, and minerals in **Longevity** contribute to digestive, immune, and joint health, and also maintain healthy energy levels. **Longevity** is especially useful in supporting the body's daily detoxification process, which helps dogs stave off common environmental toxins.

PRODUCT HIGHLIGHTS

- Great for all ages, including puppies
- Helps maintain healthy teeth & gums
- Supports healthy, flexible hips & joints
- Supports tendon & ligament health and elasticity
- Helps maintain luxurious coat & smooth, itch-free skin
- Supports immune system and energy
- Helps deodorize and neutralize urine to reduce yellow grass spots

"Lizzie is healthy ... and going strong at 10 years old."

About three years ago, our English Shepherd, Lizzie got very ill. My vet did not think she would live beyond three months. We started her on the usual liver meds, but not much was helping.

Knowing many of your products have desiccated liver in them I searched through your catalog and came upon the **Longevity** powder. So I ordered a tub and started her on that. I showed the product to my vet, and she said "there isn't an ingredient in there that I don't like." She also liked the high liver content.

Gradually she started improving. I attribute her maintaining liver health to your **Longevity** product. It helped cleanse her liver of the toxins. Lizzie is healthy and alive today and going strong at 10 years old.

Thanks for all the great products you make!

Ann Fake, Pennsylvania

Real Letters from Real People

DOGS

COCKEYSVILLE, MD 21030

P.O. BOX 1227

SPRINGTIME

“... a huge difference in his overall health.”

Dear Springtime:

I've purchased several supplements for my dogs before but nothing as effective as **Springtime**. I've used **Springtime** for 3 three years now. I now even have my family buying **Springtime** products. It doesn't matter what you buy, it's top quality and you won't be disappointed.

I had a 10-year-old German Shepherd named Vaughn, who began having some issues in January of 2016. I was devastated. I went to a couple of vets who told me the same thing, which was that my best friend was most likely going to leave us soon. I wondered if there was anything I could do to help Vaughn be comfortable, besides what the vets were giving. Vaughn was beginning to just lay around, not wanting to get up to greet us at the door as he always did. I stumbled across a breeder's website that uses your supplements and swears by them.

Springtime recommended **Longevity** and **Advanced Hip & Joint Chewables** and I started Vaughn on them immediately. I could not believe my eyes. He literally turned into a different dog. He began playing ball again, something he had not done in months. He would greet us at the door when coming home. And although the disease was slowly causing paralysis of his hind legs, I could notice a huge difference in his overall health.

Vaughn

Unfortunately, the inevitable happened. We lost my baby a few months later. It was one of the most difficult times in my life, to lose Vaughn. He grew up with our children and was a protector for all he loved. I cannot thank your company enough for giving me the best, last months with our baby. Vaughn felt the best he could, using **Longevity** and **Advanced Hip & Joint Chewables**. I am forever grateful.

Sarah Bebber Gonzalez, Texas

“Maple ... began acting extremely young, dancing...”

Maple resting her dancing feet!

Dear Springtime:

About 6 months ago, I ordered **Longevity** for the first time and began feeding it to my two dogs. One of my dogs, Maple, turned 17 this past November and while fairly healthy, began acting extremely young, dancing, running around a lot more. I saw this within a couple of weeks of introducing the **Longevity**, and I have continued to see this, so I'm extremely happy with this product. As an owner who prefers to use healthy alternatives instead of drugs, I appreciate the very healthy ingredients found in your products and feel very good about giving my dogs any of your products.

Tamara Dormer, North Carolina
CPDT-KA, AKC CGC, member PPG
Professional Dog Trainer

Old Britt Feeling New Again!

Dear Springtime:

I bought **Longevity** for my three Border Collies, ages 15, 7 and (almost) 2. My old guy, Britt, had his routine blood-work run, and to the vet's surprise, his liver levels were normal! Also, since the summer, his mobility had decreased. We got him a wheelchair in October to help him walk without falling over. Two weeks ago, I had him outside without his wheelchair, and to my surprise, he was walking again! The only thing that is new or different in Britt's life is **Longevity**. I'm ordering more today!

Krysta Barnhart, Pennsylvania

Britt (left) with Ellie & Kai

Rescue Uses Longevity to Give Pups a Good Start

Dear Springtime:

I am so glad I found **Longevity**! I foster rescue dogs, and they are usually underweight and have weak immune systems. I started using **Longevity** for its nutritional support of the immune system. I add it to a quality food to help give pups a good start. I have seen good results in health and coat.

"I foster rescue dogs, and they are usually underweight and have weak immune systems. I started using Longevity for its nutritional support of the immune system."

I believe **Longevity** gives them a better chance of staying healthy and whole.

I'm including photos (right) of a female pup, showing before and after three weeks on **Longevity**. This little girl was weak and thin when she came in. But she was strong and healthy when she left to find her adoptive home.

Carol Motsinger, North Carolina

A female puppy enters the rescue underweight...

... and after 3 weeks on Longevity, she is strong and healthy for her adoptive parents.

SPIRULINA

THE GLOBAL SUPER-SUPPLEMENT SUPPORTS A HEALTHY IMMUNE SYSTEM FOR A VARIETY OF BENEFITS

Spirulina is a microscopic blue-green vegetable algae that is considered to be one of the most nutrient-dense foods available. Spirulina is a source of highly absorbable protein, mixed carotenoids and other phytonutrients, B vitamins, iron, chlorophyll, GLA and essential amino acids, as well as other trace minerals and nutrients.

Spirulina has emerged as an especially potent and healthy food source for humans and animals alike. Spirulina has been used for centuries as a significant food source in many different cultures, as an essential nutrient for health and vitality.

Safe and non-toxic, this vegetable algae nourishes the endocrine and immune systems. Spirulina is perhaps best known for its ability to help support a normal allergy response. High in antioxidants, spirulina is thought to help protect the body from free radicals that are found in the environment. Spirulina has also been shown to help promote

gastrointestinal health. The B vitamins in spirulina support the nervous system. In addition, spirulina supports the detoxifying role of the kidneys and liver.

HIGH IN ANTIOXIDANTS, SPIRULINA IS THOUGHT TO HELP PROTECT THE BODY FROM FREE RADICALS.

Springtime uses only the highest-grade spirulina, chosen for purity and freshness. Modern culture systems are strictly controlled, assuring 100% purity of the strain for a safe and reliable supply. And, as with all Springtime products, we choose to manufacture to USP standards, which include testing for heavy metals, pesticides and contaminants.

SPRINGTIME

Spirulina Chewables

NEW!
More manageable size for dogs!

A raw blue-green microalgae to help maintain the body's immune, circulatory, and detoxifying systems. Great support for normal, healthy allergy response.

PRODUCT HIGHLIGHTS

- Effective for seasonal support
- Supports healthy liver & kidney in their detoxifying & restorative functions
- Helps maintain proper immune system function
- Helps support the body's natural healing process
- Provides superior results compared to cooked or synthetic products

"...Spirulina Chewables* are a treat..."

Dear Springtime,

I have a small rescue/rehab for a variety of animals and many have been the recipients of your formulas. I currently have 17 dogs, and one of my favorite additions to their diet is the **Longevity**. I raise all my giant breed pups (Wolfhounds and Danes) on this, as optimal nutrition is extra important for the fast growing guys. Nearly all my critters, dogs and otherwise, think the **Spirulina Chewables*** are a treat, and really, anything I have ever ordered is top quality and well accepted by all. I operate on a shoestring budget, but their supps are a priority whenever I can spare the cost. Thanks for being a company I can count on and recommend with pride!

Janice Wolf, Rocky Ridge Refuge, Arkansas (www.rockyridgerefuge.com)

POLLEN POWER

A bee collecting pollen. Note the granule of flower pollen it is carrying on its side.

POLLEN SUPPORTS ENERGY, DIGESTION, IMMUNE HEALTH, AND MORE.

Bees collect more than honey! They collect granules of flower pollen as a food source for the adult bees in the hive. Bees would not have their famous reputation for staying busy without flower pollen. Bee-collected pollen is densely nutritious, and it has been treasured for its health properties for thousands of years for both people and animals. The benefits of bee pollen include:

- It helps support healthy muscle condition, essential for strength & endurance
- Live enzymes support healthy digestion
- It supports a healthy immune system
- Contains antioxidants, vitamins, and minerals

The key benefit of bee pollen is that it is loaded with antioxidants, vitamins, minerals, protein, and live enzymes. Because of its dense nutrition bee pollen uses include supporting energy needs, muscle strength, healthy digestion, and immune support. Bee pollen is taken as a supplement in its naturally occurring granule form, ground into a fine powder, or as part of an ingested supplement, such as a pill or chewable tablet.

Pollen contains greater concentrations of living enzymes than any other part of the plant. Scientists state that enzymes are absolutely essential for every biochemical function of the body. Enzymes are perhaps the most important of the health-giving plant factors. They are completely destroyed by high temperatures (130 degrees) – cooking! Enzymes are the essential triggers for the metabolic machinery of every living thing from daffodil to buffalo. The enzymes in raw foods are important because they help support the body's own enzyme systems. Enzymes are the life principle of every living cell.

Bee Pollen for Seasonal Support

Bee pollen supports the immune system. When the immune system is functioning properly, it is less likely to overreact to non-threatening stimuli, like seasonal allergens, with annoying sneezing, coughing, and itching. Typically it is not necessary to consume local bee pollen to achieve the health benefits. This is a common misconception. The immune system benefits of bee pollen operate with a biological mechanism in which the origin of the bee pollen makes no difference whatsoever.

The Secret to Our Success...

Bee pollen is the foundation on which **Springtime** was built. Our founder, Dennis Hampt, had been using bee pollen for his own health for years when he discovered the positive impact that it had on his dog (see pg. 79). This gave him the idea to sell bee pollen for animals, specifically to horse trainers, whose careers depended on the optimal health of their animals. The trainers were skeptical at first, but the performance on the track was all the proof they needed that bee pollen was a difference maker! The company that became **Springtime** was born.

Bee pollen would end up being a key ingredient in other **Springtime** products for horses, and then dogs, and then for people. Today **Springtime** has a wide array of natural products, but **Springtime Bee Pollen** is still enormously popular, and bee pollen remains a key ingredient in some of our most popular and effective products.

Bee Pollen

Bee-collected pollen contains protein, vitamins, minerals, antioxidants, and live enzymes for optimal health and vitality.

Bee Pollen was the first supplement marketed by **Springtime** back in 1979. After 40 years, it is still one of the best ways to maintain healthy dogs.

- Supports healthy muscle with natural plant sterols & growth factors
- Helps maintain healthy blood count
- Supports the immune system
- Immune support contributes to seasonal comfort
- Antioxidants help eliminate free radicals

"Four years of suffering GONE!"

Dear Springtime:

This is our big boy, Max. He's five. Since he was a year old he has suffered terribly from allergies. We tried everything we could think of — anything to save him from pure misery, but nothing was working. So one day, after searching for natural answers, I found **Springtime**. I can't tell you enough how wonderful this has been for Max's life. Four years of suffering GONE!

I Googled and found that **bee pollen** helps manage allergies. His fur is coming back full and thick, and his joy level is off the charts. Can you imagine how we feel? THANK YOU!

Debbie King, Oklahoma

Debbie & Max

C-Complex

A full spectrum of accessory nutrients to support a dog's immune system and connective tissue.

C-Complex is a powerful vitamin-C formula, enhanced with bioflavonoids and nutrient-rich bee pollen for supporting a healthy immune system and joint health.

- Contains bee pollen, to support a healthy immune system
- Fully supported vitamin C
- Safe source of pro-vitamin A
- Contains free-radical-fighting antioxidants
- Supports connective tissue, tendon, and ligament health
- Supports a healthy immune system
- Maintains a normal inflammatory response

C-COMPLEX

Ascorbic Acid (Vitamin C)	873 mg
Bee Pollen	873 mg
Hesperidin	297 mg
Citrus Bioflavonoids	209 mg
Rutin (Vitamin P)	6 mg

Inactive ingredients: Carrot powder.

"...he looks amazing!"

The great Apollo

Dear Springtime,

I show one of my Great Danes, and with his raw diet, the **C-Complex**, and all of the other supplements from you guys, he looks amazing! Here is a photo of my boy that shows your supplements at work! His call name is Apollo and his registered name is Daynakin Lucien Logan - Star Soleil. He is an 8-titled dog in the U.S.A., Canada, and internationally. I'm so particular about what my Great Danes eat.

Victoria Elkins, Washington

Astaxanthin

One of nature's strongest antioxidants providing powerful defense from free radicals.

Astaxanthin is a reddish pigment that belongs to a group called carotenoids. It is found naturally in certain algae and is what gives shrimp, salmon, and other seafood their pink/red color. Oxidative stress causes damage to the cells, proteins, and DNA in your dog's body. **Astaxanthin** is one of the world's strongest antioxidants in free radical scavenging by 20x – 60x! It provides a unique and powerful defense from free radical damage to the brain, nervous system, and eyes due to its stability to cross the blood-brain and blood-retinal barrier.

- Helps maintain peak performance; increased endurance, energy, and strength
- Supports healthy cardiovascular function for working, sport, and active dogs
- Supports the body in recovery from exercise
- Supports and protects healthy gums
- Supports skin health during UV and sun exposure

New Mom Tilly Got a Shiny New Coat!

Dear Springtime:

Tilly had puppies in May, and her coat started to thin. I'm amazed at how quickly the addition of **Skin & Coat Oil** made a difference in Tilly's condition. It took just one week for Tilly's coat to begin to fill in and return to a beautiful gloss.

Sandy Stokes, West Virginia

Tilly's coat has come back beautifully after having puppies.

Omega 3-6-9

Distilled wild fish oil with full-spectrum essential fatty acids for a shiny coat and healthy skin.

PRODUCT HIGHLIGHTS

- Helps the body maintain a brilliant, shiny, weatherproof coat and healthy skin
- Provides complete full-spectrum omega 3, 6, and 9
- Distilled wild fish oil has been purified to ensure no heavy metals, PCBs, etc.—absolutely clean and safe
- Supports healthy hip and joint mobility

"...within a few weeks, his hair grew back."

Dear Springtime:

My dog, Huckleberry, lost a patch of hair above his tail. When I saw your catalog and got **Omega 3-6-9**, it has been a huge support. I started Huckleberry out on double dose and within a few weeks, his hair grew back. We get compliments about how shiny he is.

Patches Brown, Ohio

Huckleberry's hair has grown back shiny!

Real Letters from Real People

"Skin & Coat Oil has solved a big problem..."

Skin & Coat Oil has solved a big problem that I haven't been able to solve, even with different vets.

I have had Kipper, a rescue dog for 5½ years now. When I adopted him, he had a bad habit of sucking on one of his rear paws. The foster home who kept him told me that this was an ongoing thing, and although their veterinarian couldn't find a solution, it didn't seem to be a big problem. For 5 years he and I lived with it. Our veterinarian couldn't find a solution either, other than several baths a week using an antibiotic shampoo. That didn't cure it.

We moved across country, to a totally different environment, and it got much worse. Even with the veterinarian's help, his leg became discolored, and he was nibbling at it constantly. Then came **Skin & Coat Oil**. After three days, he was nibbling at his leg and hind quarters far less. Since then, it has stopped completely. He is no longer sucking at his rear paw, either. The coloring is almost completely normal. He is resting well, and not in constant irritation, so his temper is better, and he has more energy.

I am attaching a recent photo of Kipper. He is 24½ lbs. and on a strict diet. He would be much heavier if I let him eat all that he wanted. In fact, he was much heavier when I got him. He is half Pembroke Corgi,

Kipper's back paw is no longer itchy.

and half French Bulldog, and he is adorable. If Kipper had a Facebook account, he would have many, many friends, much more than I do. But he wouldn't keep it up, so he can't have one!

I have used **Springtime** products on my dogs since 1986, and I recommend them to everyone with a dog.

Rick Siegert, Oregon

Ranger Joe is looking and feeling great!

"...his coat is sleek and shiny."

Dear Springtime:

I have four German Shepherds. Ranger Joe, my senior, was itching and digging at himself to the point that he was pulling his hair out, and his fur felt like a steel wool scrub pad. His coat was dull, and his left hind leg was somewhat unstable at times. I know he was feeling his age (6 ½ years old).

I put him on your **Omega 3-6-9** and **Joint Health Chewables**. Wow! In three days, I saw a tremendous difference in his movement. He was running like my two year old dog. His fur is now soft and his coat is sleek and shiny. Thank you so much for answering his S.O.S. call (Save Our Skin).

Leah Sullivent & the boys – "Ranger Joe, Rommel, Panzer, Sergeant Major," Missouri

Diatomaceous Earth

A natural, chemical-free way to rid your dog of an active flea infestation.

If your dog has fleas, or is exposed to fleas, **Springtime Diatomaceous Earth (DE)** is a tactical solution to rid your pet and home of an active infestation of these pests.

- Microscopically sharp edges of the diatoms pierce the flea’s protective coating, so they dehydrate and die
- Works great on bedding, furniture, and carpet
- Chemical and poison free
- Easy to use – sprinkle directly onto pet and/or to exposed living spaces (e.g., carpet, bedding, etc.)
- Great in conjunction with **Springtime Bug Off Garlic** for ongoing year-round support

DIATOMACEOUS EARTH			
SIZE	REG	SALE!	\$/OZ
★ 1 lb	\$15.00	\$12.00	75¢
Buy two 1 lb jars get ONE FREE	\$30.00	\$24.00	50¢

★ Available as a free bonus. See page 39.

PRODUCT FACTS

Ingredients: Diatomaceous earth.

Directions for Use:

Sprinkle directly on your dog’s coat, taking care to avoid the eyes and nose. Using your hands, work into the fur and onto the skin underneath, focusing on areas where fleas may try to hide. It is okay to leave DE on your dog for up to 48 hours before bathing. If used on carpet, bedding, or furniture, DE can be vacuumed up after 48 hours, taking care to avoid dust.

THE ULTIMATE ONE-TWO PUNCH FOR COMBATTING FLEAS:

- 1) Eradicate existing fleas by rubbing your dog’s coat and living spaces with a generous amount of diatomaceous earth (avoid nose & eyes).
- 2) Prevent future flea infestations with diatomaceous earth and **Bug Off Garlic** (see pages 40-45)

PRODUCT FACTS

Active Ingredients per tablet (2.35 g):

Garlic (<i>Allium sativum</i>)	1,000 mg
Active Dry Yeast	350 mg

Inactive ingredients: Desiccated beef liver, dextrose, microcrystalline cellulose, and stearic acid.

REAL BEEF LIVER

Springtime uses beef liver in generous quantities to make our dog products easy to give. The beef liver is from hormone-free cattle raised in pristine wild areas of Argentina. The beef liver is also loaded with essential vitamins and minerals dogs need.

Directions for Use:

Initial Dose: Introduce gradually over the first few days by using a fraction of the Daily Maintenance Dose. Do not be discouraged if your dog does not take to the change immediately. Once the Maintenance Dose is achieved, it might take 2-4 weeks to maximize protection.

Daily Maintenance Dose:

WEIGHT	DAILY DOSE	WEIGHT	DAILY DOSE
Up to 10 lb	¼ tablet	40-80 lb	2 tablets
10-20 lb	½ tablet	80-120 lb	3 tablets
20-40 lb	1 tablet	120 lb & over	4+ tablets

Recommended: Tablets may be broken into pieces. Year-round use is recommended. Double or triple doses are recommended for areas of high infestation as is increasing the dosage in the spring and fall when insects tend to surge.

Variances on color and aroma from batch to batch are normal.

WHY GARLIC?

- Eating garlic gives dogs a natural 24-hour shield against fleas, ticks, mosquitoes, gnats, etc.
- A safe, effective alternative to chemical products
- Supports friendly bacteria in the digestive tract
- A natural source of dietary sulfur, including MSM
- Supports a healthy immune system
- Great in conjunction with **Diatomaceous Earth** (pg. 5) for existing infestations

Bug Off Garlic Granules

100% air-dried garlic granules – a safe and effective natural bug repellent.

Veterinarians versed in natural alternatives use garlic in their private practices throughout the world. Although best known for its health protective properties, garlic has been used for centuries as an insect repellent. **Springtime's** air-dried garlic takes that benefit to a new level and is far safer than many chemical products. You may use this product with total confidence.

SPRINGTIME

"...I came home with two ticks, but they had none!"

Dear Springtime:

I just wanted to let you guys know my dogs love your **Bug Off Garlic Chewables**. They have had no problems with ticks or fleas. In fact, we went hiking the other day, and I came home with two ticks, but they had none! Our German Shepherd, Atticus, had allergies when we first got him, and we didn't want to continue to put chemical pesticides on him. This was a great alternative. Atticus and Gibson thank you! They are two happy customers!

Kelli Bisch, New Jersey

Gibson (top) & Atticus (bottom) love Bug Off Garlic.

"...never had a single tick..."

Dear Springtime:

I've been using Springtime products for at least 5 years now. This boy here has been on **Bug Off Garlic Granules** ever since he was born. First, he got it through his mother, then, when the pups were weaned, the **Bug Off Garlic Granules** went onto their puppy food.

He is now two and a half years old and never had a single tick or flea in his life.

Sandra King, New York

"...Bug Off Garlic Granules make our dogs tick-free."

Dear Springtime:

At our non-profit, no-kill dog rescue in the north woods of Wisconsin, we face a huge insect problem. Before we implemented **Bug Off Garlic**, I was pulling ticks off of our terriers nonstop. We tried various well known dog pesticide products and found that **Bug Off Garlic Granules** make our dogs tick-free. All of the rescue dogs, as well as my personal dogs, are on **Bug Off Garlic Granules** for Dogs.

Penny Wagner, The Dogs of First Friends Animal Rescue Inc., Wisconsin

No ticks at the Dogs of First Friends Animal Rescue!

Common Questions About Garlic

SPRINGTIME ANSWERS SOME OF THE MOST COMMONLY ASKED QUESTIONS ABOUT GARLIC.

How garlic works as a bug repellent:

“It would seem that the powerful compounds such as allicin which garlic releases are inimical to mosquitoes. They have therefore evolved to avoid garlic. Another possibility is that the strong smell of garlic overwhelms the mosquito’s sense of smell and prevents them from finding the prey. Whatever the mechanism, garlic’s ability to repel a variety of pests has been proven scientifically.” (Mendham, Trevor. “A Natural Mosquito Repellent: Garlic for Mosquito Control.” Garlic Central. 2003-2005.)

Garlic safety:

Springtime has sold literally tons of garlic a year for over 20 years, and in that time, we have talked to plenty of customers concerning garlic’s efficacy, health benefits, and safety for both dogs and horses. There is a lot of misunderstanding about garlic, and most of the confusion stems from a single study in Japan where four dogs were force-fed extremely large amounts of raw garlic. Garlic preparations vary in chemistry, and the air-dried garlic we use contains very little of the oxidative component that may cause problems if used in excess, so it is gentle and absolutely safe for everyday, year-round use. We feel you may give our garlic with complete confidence.

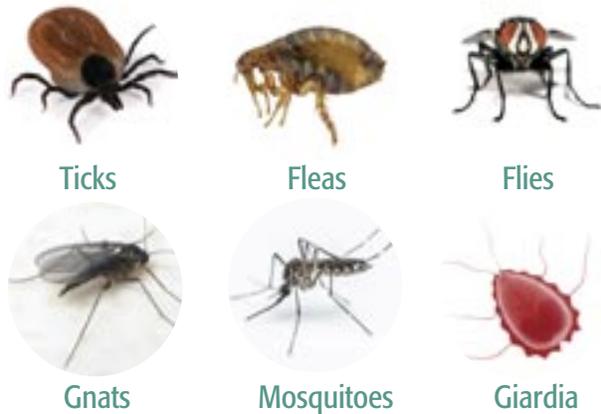

Garlic for pregnant, nursing, and newborn animals:

Many of garlic’s nutritional and protective properties are passed on from the mother to the baby during gestation. The customers who have had the best experiences with nursing animals and garlic have introduced it very slowly, taking at least 10 days to ensure acceptance. Foals or puppies can be given garlic as soon as they are weaned. Many breeders report great results with this.

Increasing garlic with the change of seasons:

Customers report best results when they give **Bug Off Garlic** year-round, and double or triple the dosage in the spring and the fall. Most people are aware that spring can be very buggy, but it’s less well known that fall is a concern, too. Insects like ticks surge in the fall, desperately looking for a last blood meal to survive the winter. We recommend giving **Bug Off Garlic** daily, year-round, because it can be challenging to re-introduce **Bug Off Garlic** after a hiatus, particularly with picky animals.

What kind of bugs are repelled by garlic?

Garlic for animals other than dogs and horses:

Our customers have used garlic successfully on miniature horses, donkeys, goats, sheep, rabbits, alpacas, llamas, deer, and cats as well as many other farm animals. You can calculate the correct dose by body weight according to the dog recommendations for smaller animals or the horse recommendations for the larger animals.

Garlic as a dewormer or heartworm preventative:

Although **Bug Off Garlic** is helpful in reducing both internal and external parasites, you may wish to consult your practitioner for these issues. For a list of holistic veterinarians in your area, you can visit the American Holistic Veterinary Medical Association online (<http://www.ahvma.org/>).

Garlic for picky or finicky animals:

For dogs and horses, starting off slowly is key. Introduce gradually over the first few days by using a fraction of the Daily Maintenance Dose. Do not be discouraged if your dog or horse does not take to the change immediately. Once the Maintenance Dose is achieved, it might take 2-4 weeks to maximize protection.

Garlic granules with dry food:

Customers who give grain, pellets, or kibble have developed various strategies to prevent garlic granules from falling to the bottom of the bucket or bowl. For horses, customers have often reported using a spray bottle filled with water, lightly spritzing before sprinkling the garlic on with great success. For dogs, mixing the granules with a little bit of a favorite canned goods, plain yogurt, liverwurst, or peanut butter, often helps.

GARLIC: FRIEND OR FOE?

By Dr. Deva Khalsa

Reprinted with permission from *Dogs Naturally Magazine* (September-October 2013).

Garlic (*Allium sativum*) has been valued for thousands of years for its medicinal purposes. Five thousand year old Sanskrit and Chinese medical manuscripts describe the benefits of garlic. Today, garlic is grown all over the world and is making a strong comeback as a potent, effective, natural remedy.

Garlic is a member of the lily family and of the same genus as the onion. Garlic has been used for thousands of years as a medicinal herb; in fact, Hippocrates advocated garlic for infections, cancer and digestive disorders. The great Roman naturalist, Pliny the Elder, also recommended garlic for a wide variety of ailments, ranging from the common cold to epilepsy and cancer.

Modern science has also established the fact that garlic boosts immunity, gets rid of bacterial, viral and fungal infections, enhances liver function, helps detoxify the cells in the body, lowers cholesterol and triglycerides in the blood and even fights cancer.

Raw garlic cloves contain a high amount of a compound called alliin, as well as the enzyme alliinase. When garlic is crushed or diced, the alliin comes into contact with the alliinase enzyme and the compound allicin is formed. Cooked garlic is not nearly as therapeutic as freshly crushed or finely diced raw garlic.

A Victim of Poor Press

Recently, the safety of garlic for dogs has come into question. That's because one research study used a huge amount of garlic in their test dogs. When garlic is fed in very large amounts to dogs, it can cause oxidative damage to red blood cells, leading to a medical situation called Heinz body anemia. Knowledge is a powerful thing, but astute pet owners should gather all the data about garlic before shunning this celebrated bulb.

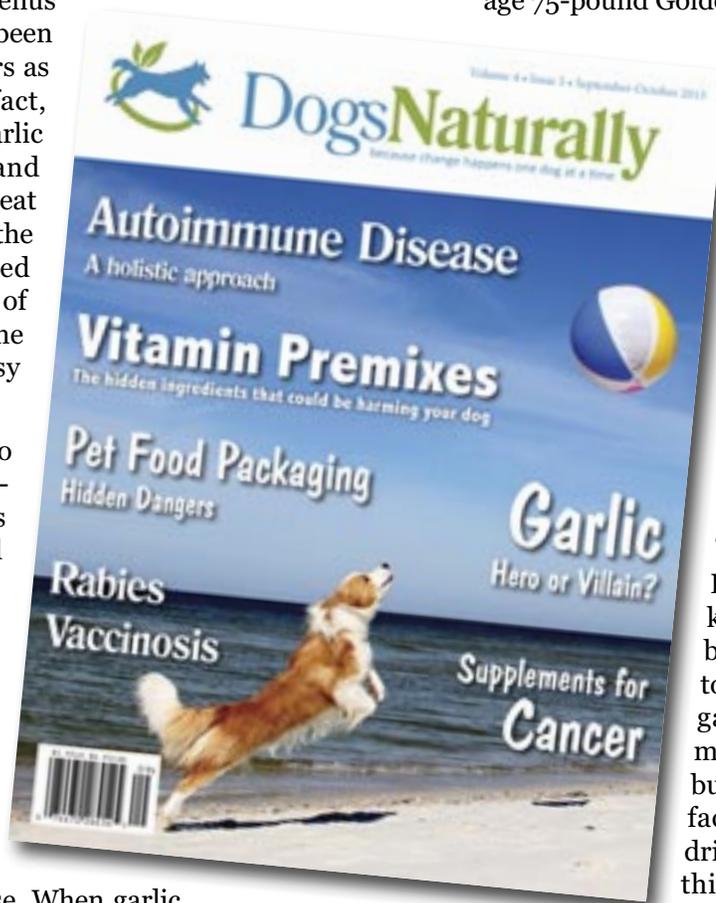

Ironically, garlic is approved as a flavoring, spice or seasoning for use in pet food, yet the FDA has listed garlic in its poisonous plant database. That's because a study suggested that when garlic is fed in excessive quantities (5 grams of whole garlic per kilogram of the dog's body weight), it might cause damage to the red blood cells of dogs.

Considering the data presented in this study, the average 75-pound Golden Retriever would need to eat five full heads of garlic or about 75 cloves of garlic in each meal before there would be any adverse effect on the red blood cells. Similarly, a dog weighing a mere 10 lbs would need to eat 25 grams of garlic – about half an entire head of garlic, or about 6 to 8 garlic cloves in every meal to experience any adverse effects.

How many dogs do you know who would either be given or would want to eat that many cloves of garlic? Drinking too much water can kill you, but we all drink water. In fact, we all know that drinking water is a healthy thing to do. So what's healthy and what's too much? It's obvious that all this "garlic is bad for your dog" hype has been taken totally out of context.

Furthermore, the total reported adverse affects from garlic add up to a non-event over the past 22 years. The National Animal Supplement Council responsibly records both Adverse Events and Serious Adverse Events resulting from the use of natural products.

A Serious Adverse Event is defined as: "An Adverse Event with a transient incapacitating effect (i.e. rendering the animal unable to function normally for a short period of time, such as with a seizure) or non-transient (i.e. permanent) health effect." 900 million doses of garlic over a 22 year time span resulted in only two Serious Adverse Events and these episodes

could very well have been due not to garlic, but to another ingredient in the mix. This proves beyond a shadow of a doubt that the risk of using garlic is so low that it's statistically insignificant.

It's Time to Reconsider Garlic

What is significant is all the positive research delineating the medicinal powers of garlic. Among garlic's reputed benefits, perhaps the best known is its natural antibiotic activity, with reports going back through history. In fact, Pasteur noted garlic's antibacterial benefits in 1858. Modern researchers have compared the effectiveness of garlic with that of antibiotics and have found that garlic has a broad spectrum antibacterial effect. Additionally, bacteria don't seem to build up a resistance to garlic as they do to many modern antibiotics.

But that's not all. Garlic increases the immune activity of Killer Cells (cells that seek out and kill invading bacteria and cancer cells). Uncooked garlic also helps lower blood triglycerides and cholesterol, making it useful for certain breeds (Schnauzers and Beagles) that are predisposed to this problem.

A 1988 study found that diallyl sulfide, a compound in garlic, prevented tumor formation in rats. Other studies have shown that garlic inhibits various forms of cancer growth in the body. Garlic also enhances overall liver function and triggers enzyme responses to help break down waste materials before they go into the bloodstream. In other words, garlic helps the liver out – and in today's toxic world, our dogs' livers need all the help they can get.

Additionally, garlic has been fed to dogs to help prevent flea infestations. There are many products on the market containing garlic for this very purpose. Both powdered and raw garlic are effective, although raw garlic has significantly more health benefits.

How to Prepare Garlic

To release its medicinal properties, garlic first has to go through a chemical process so the allicin can be created. It's best to finely chop or crush the garlic clove, then wait a few minutes to allow the chemical reaction to occur. The healing allicin is unstable when exposed to air and heat, so don't wait more than 20 minutes before you top your dog's meal with some healthy raw garlic.

A host of studies provide evidence that the allicin in garlic works to inhibit cancer formation. With cancer being the number one cause of death in dogs in the United States, let's all get going with garlic! Buy a garlic press or simply

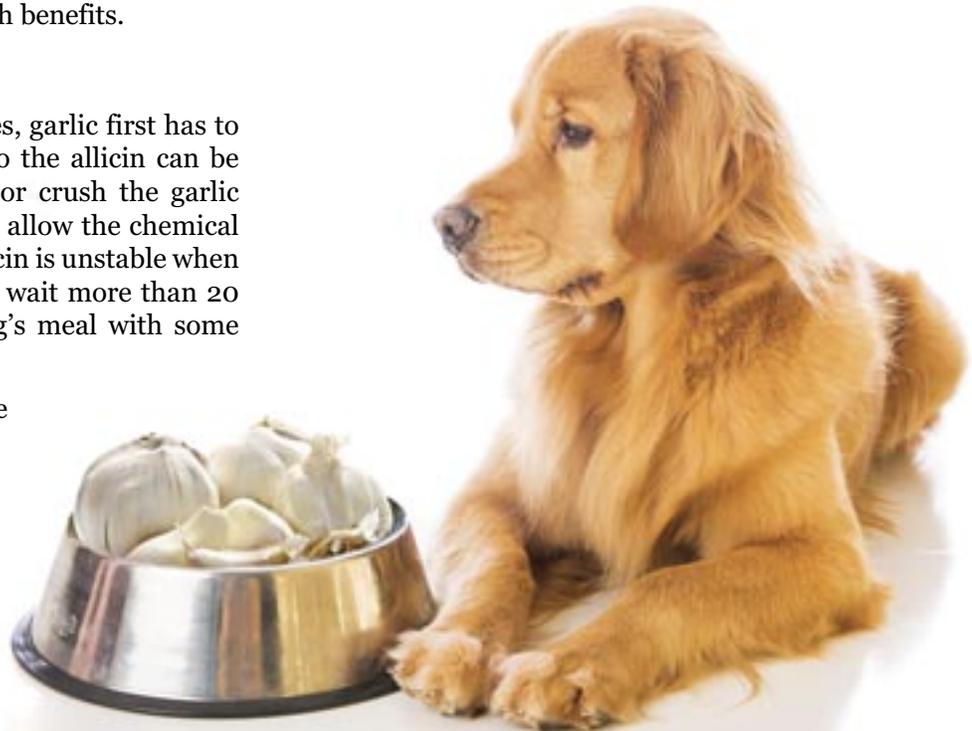

chop some up. You can then mix it in with your dog's meal.

While cooking garlic destroys allicin, other components in cooked or powdered garlic continue to provide some benefits to your dog's health. The cooked garlic will still function as an antioxidant and help flush toxins out. If you cook meals for your dog, it's totally fine to add garlic as a flavoring and for improved health.

It's no wonder garlic has been valued for thousands of years for its medicinal purposes. Five thousand year old Sanskrit and Chinese medical manuscripts describe the benefits of garlic but today, garlic is still grown all over the world and is making a strong comeback as a potent, effective, natural remedy.

About Dr. Deva Khalsa

Since beginning her holistically oriented veterinary practice over 25 years ago, Dr. Khalsa has been incorporating homeopathy, acupuncture, Chinese Herbs, nutritional advice, allergy-elimination techniques such as NAET and also JMT into her approach. Today her work is a blend of sophisticated holistic techniques and traditional veterinary medicine designed to best enhance the natural strengths and attributes of her patient. Aside from her impressive career and dedication to teaching within the veterinary world, Dr. Khalsa loves sharing her knowledge with the public. She coauthored, 'Healing Your Horse: Alternative Therapies' (Howell Book House, 1993), and most recently authored, 'Dr. Khalsa's Natural Dog' (Kennel Club Books, 2009), a book best described as a 'holistic bible' for dog owners. Dr. Khalsa is a Fellow and Professor of the British Institute of Homeopathy. She has lectured both nationally and internationally.

Stress Free Calmplex

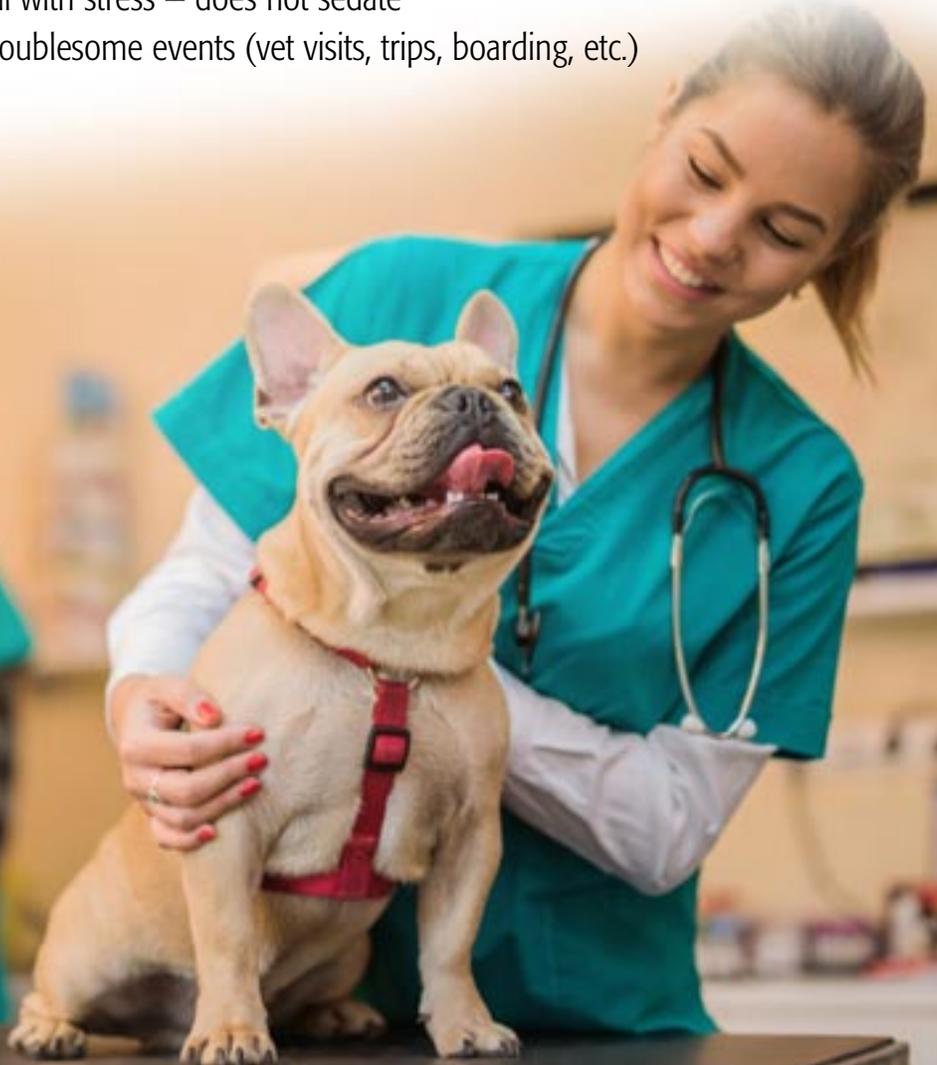

A safe and natural supplement with quality ginseng and other natural ingredients to help dogs manage stress.

There is a big difference between high-energy exuberance and stressed-out nervousness. **Stress Free Calmplex** helps the body's natural processes for managing physical and mental stressors. Works best when given daily, but can be double-dosed to target events.

PRODUCT HIGHLIGHTS

- Helps manage separation anxiety
- Helps support focus and concentration
- Excellent for showing and performing
- Supports ability to deal with stress – does not sedate
- Helps dogs manage troublesome events (vet visits, trips, boarding, etc.)

"...incredible how he has changed."

Dear Springtime:

Just a quick note to say thank you. I have a "herder with attitude" dog, a Border Collie and Akita cross named Reo. I have had him on **Stress Free Calmplex** for most of this year, and it is incredible how he has changed. Yes, he's still very active, but he has now curbed his tendency to be aggressive. As he was a rescue dog, this is good going for him. I hope he will make an agility dog one day, but at the moment, we just keep plugging away to get good behavior out of him.

Maxine Mobbs, Ohio

Reo is ready for anything.

HAS SOMEONE BEEN A GOOD DOG?

SPRINGTIME TREATS

Real meat treats that dogs love.
Nothing more, nothing less.
Made in the USA.

The typical supermarket dog treat is a processed, molded, dyed concoction of mystery ingredients. Your dog deserves better. That's why we created **Springtime Treats**.

Your dog will love these honest, old-fashioned treats, with the flavors and chew to satisfy a dog's ancient cravings. And you'll love giving your dogs a natural treat that is made in the USA with high quality ingredients, like duck and beef — and NEVER any fillers, preservatives, or dyes.

Springtime: Helping dogs live happier, healthier lives.

Beef Trachea

Top grade beef trachea, a healthy chew your dogs will love! A natural source of chondroitin sulfate and glucosamine.

Dogs LOVE to chew! Why not use a healthy chew that keeps their teeth and gums clean and is a natural source of chondroitin sulfate and glucosamine? Our oven-dried **Beef Trachea** is delicious and chewy enough to keep dogs happily occupied for a while.

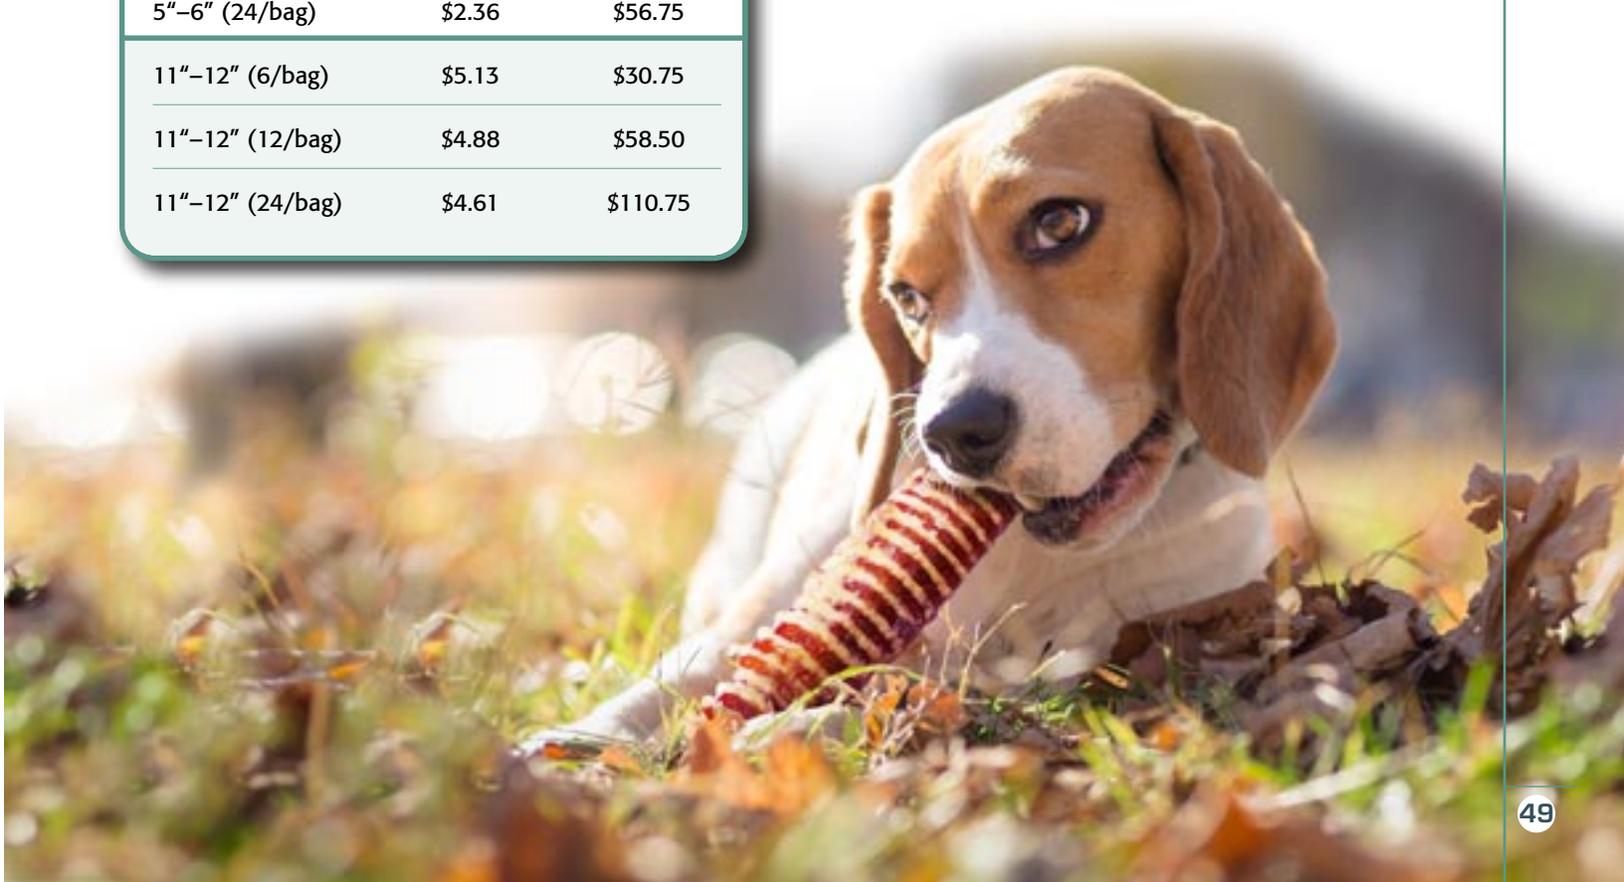

Ingredients: Natural beef trachea.

PRODUCT HIGHLIGHTS

- Oven-dried for best flavor
- Minimal odor
- Supports healthy teeth & gums
- Supports joints & connective tissues
- Single ingredient – nothing added
- 100% digestible
- Sourced & made in the USA

NOTE: Store in a cool, dry place. Supervision is recommended, as with any chew or toy.

Bully Sticks

Natural bully sticks made from 100% U.S. beef with no added dyes, preservatives, or chemicals.

Springtime Bully Sticks are made from 100% U.S. beef with no added dyes, chemicals, or preservatives. Chewing is a natural behavior in dogs, but we would prefer they chew on safe, healthy treats rather than less than desirable substitutes like our new leather shoes or the dining room table legs. **Springtime's** line of long-lasting, natural **Bully Sticks** encourages healthy chewing habits, while keeping dogs happy and occupied (making dog owners happy as well!). And **Springtime Bully Sticks** work great as a dental treat, keeping gums and teeth healthy without additives or sugary carbohydrates.

Sourced and made in the USA, our **Bully Sticks** are a safe alternative to chemically laden, potentially dangerous products like many rawhide products. Our lines of **Bully Sticks** are 100% digestible, low in fat, gluten-free, and a good source of protein.

5 DELICIOUS BULLY VARIETIES

All of our Bully Sticks are 100% natural beef pizzle, made in the USA without any dyes, additives, preservatives, or other chemicals. Finally, a healthy, natural chew for dogs.

Our **Bully Sticks** are triple-washed naturally without any chemicals to minimize odor. **Springtime's Premium** and **Jumbo Bully Sticks** are hung to dry, allowing any natural juices to drip off, ensuring a low-odor product. **Springtime's Choice Bully Sticks** and **Braided Bully Sticks** are laid flat and oven-dried, retaining some of the natural juices, making them extra tasty for dogs.

Choice - Best Tasting

Springtime's Choice Bully Sticks are oven-dried in their natural casings for extra flavor! All the trimmings left on the **Bully Stick** creates a great natural texture for helping to keep teeth clean. These **Bully Sticks** are laid flat when dried, so some of the natural juices may remain, making them extra tasty for dogs yet low-odor.

Premium - Long Lasting

Our free-range **Premium Bully Sticks** are extremely tasty and low odor. Denser and longer lasting than our **Choice Bully Sticks**, the **Premiums** are hardy enough for the big chewers, yet still chewable for smaller mouths. **Premium Bully Sticks** are food-grade, triple-washed, and hung vertically to dry, ensuring minimal odor.

Curly - A Fun Twist

Springtime Curly Bully Sticks are a fun and yummy challenge for the dog who really loves to chew. Our **Curly Bully Sticks** are the same low-odor, high-quality beef pizzle you have come to expect from **Springtime**, but with a twist! These bully sticks are perfectly curled and triple-washed for maximum fun and minimal odor.

Braided - Triple the Fun

Our best bully value are our free-range **Braided Bully Sticks**. Three premium **Bully Sticks** are twisted together for a taste-tempting treat and chew toy in one. Dogs love to puzzle and chew apart these bullies – a busy dog is a happy dog! Top of the line in taste and quality, these **Bully Sticks** are easily digestible.

Jumbo - Big Chew for Big Dogs

Springtime's low-odor, free-range **Jumbo Bully Sticks** are extra dense and thick for maximum chewing and boredom busting. Big dogs or heavy chewers love to sink their teeth into this flavorful, long-lasting treat. Top of the line in taste and quality, these **Bully Sticks** are easily digestible, with no additives or preservatives.

NOTE: Store in a cool, dry place. Supervision is recommended, as with any chew or toy.

Dog Cookies

Unique, savory protein cookies for dogs, made in the USA with real duck and beef. Smokehouse-dried with no additives or preservatives.

Springtime's line of healthy, natural **Dog Cookies** are smokehouse-dried with premium ingredients for tantalizing taste. These savory meat treats are made in the USA with food-grade ingredients. No fillers, additives, dyes, by-products, chemicals, or preservatives. They come in two varieties: **Beef Liver & Coconut Cookies** and **Duck Cookies**.

PRODUCT HIGHLIGHTS

- Smokehouse-dried for rich flavor
- Can be broken up for training treats
- Good source of protein, low in fat
- Antioxidant, nutrient-rich
- Gluten free
- Sourced and made in the USA

Ingredients:

Beef Liver & Coconut Cookies: Beef liver, coconut, and egg powder.

Duck Cookies: Duck meat and egg powder.

NOTE: Store in a cool, dry place. Supervision is recommended, as with any chew or toy.

2 DELICIOUS COOKIE VARIETIES

Your dog will love both cookies as a protein-rich treat or as a training reward.

Beef Liver & Coconut Cookies

Dogs come running for the taste of beef liver and coconut! **Springtime's Beef Liver & Coconut Cookies** are slowly dried at low temperature in vintage smokehouses for peak nutrition and flavor. These cookies are full of vital nutrients to help maintain an active lifestyle.

These cookies are made with only three premium, food-grade ingredients: beef liver, coconut, and egg powder (a good source of protein that acts as a binder). This is a healthy treat with no fillers, by-products, dyes, chemicals, or preservatives.

Rich in antioxidants and B vitamins, liver is known to be beneficial for the nervous system, blood, and brain health. Coconut, a great source of fiber, folate, and a host of essential fatty acids, can help protect against cardiovascular and neurological diseases.

Duck Cookies

Dogs adore **Springtime's** delicious **Duck Cookies**. Low in fat and high in protein, duck meat is a rich source of vitamins, minerals, antioxidants, and healthy fatty acids. Duck meat is also an allergy-friendly alternative for dogs that are food sensitive to chicken or beef. **Springtime's Duck Cookies** are slowly dried at low temperature in vintage smokehouses for peak nutrition and flavor for an active, healthy lifestyle.

Our **Duck Cookies** are made with just two premium, food-grade ingredients: duck meat and egg powder (a healthy protein that acts as a binder). This is a healthy treat with no fillers, by-products, dyes, chemicals, or preservatives.

★ Available as a free bonus. See page 39.

Sweet Potato Pieces

Natural slices of 100% sweet potato, rich in dietary fiber and healthy antioxidants, including carotenoids and vitamin A.

Dogs love the crispy, crunchy texture and delicious taste of **Springtime Sweet Potato**. Slowly oven-dried, sweet potatoes are rich in dietary fiber and healthy antioxidants, including carotenoids and vitamin A.

In South America, sweet potato has been valued for its health benefits for thousands of years. Sweet potato (which is different than the white potato) helps maintain health and longevity with its abundant nutrients, such as vitamins A and C, vitamin B 6, magnesium, iron, potassium, calcium, and copper.

PRODUCT HIGHLIGHTS

- Healthy, crunchy sweet potato
- Slow-dried for best flavor
- High in dietary fiber & antioxidants
- Single ingredient – nothing added
- 100% digestible
- Sourced & made in the USA

Beef Tendons

Tasty and chewy, Beef Tendons are made with 100% U.S. beef, rich in chondroitin sulfate, glucosamine, and collagen.

Springtime Beef Tendons are slow-dried, tasty treats your dog will adore. High in protein, low in fat, **Beef Tendons** are a delicious complement to a nutritious diet with no added preservatives.

Other cultures have incorporated beef tendons in their cuisine for thousands of years, touting their health properties for healthy skin, joints, bones, and hair. Easily digestible, beef tendons are the fibrous bands of connective tissue that are rich in collagen, glucosamine, chondroitin sulfate, and elastin. This fibrous texture also makes for cleaner teeth and gums with maximum chewing satisfaction.

PRODUCT HIGHLIGHTS

- Slow-dried for best flavor
- Natural source of chondroitin sulfate, glucosamine, and collagen
- Great dental brushing action
- Single ingredient – nothing added
- 100% digestible

Beef Ligaments

Protein-packed Beef Ligaments are a lower calorie chew for dogs of all sizes.

Dogs love variety as much as they love to chew, so treat your dog to our unique **Beef Ligaments**. These slow-dried **Beef Ligaments** start off crunchy and gradually become extra chewy, making them a fun and long-lasting treat for your dog. **Beef Ligaments** are naturally low in calories and packed with protein, and they have a size and firmness that makes them ideal for dogs of all sizes. **Springtime's Beef Ligaments** are sourced and made in the U.S.A. without preservatives or dyes. Because our **Beef Ligaments** are 100% digestible, they're a safe alternative to products like rawhide. They're a healthy treat that are high in protein, low in calories, low in fat, and gluten-free.

PRODUCT HIGHLIGHTS

- Natural source of chondroitin sulfate, glucosamine & collagen
- A fun combination of crunchy & chewy
- Slow-dried for best flavor
- Great source of protein
- Low in calories & fat
- 100% digestible
- Great dental brushing action
- Single ingredient – nothing added

Love, love, love Springtime! Our dogs think the bully sticks, sweet potato treats, and tendon chews are **WONDERFUL!** Great prices, packaging, and shipping, and customer service is great – very knowledgeable and helpful.”

~Iva Rahlf, South Dakota

“I love the Beef Trachea treats from Springtime! Especially tasty in the snow! Woof!”

~Creede
(and Creede's mom,
Sue Armijo, Colorado)

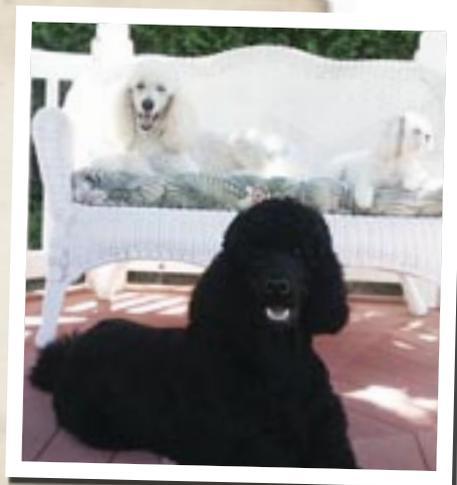

“My dogs love the Beef Liver & Coconut Cookies, and I feel good about giving them...”

~Martha McCormick, South Carolina
Asgaard Kennel Bernese Mountain Dogs

“Just wanted to let you know that our bag of Duck Feet arrived today, and they are a big hit, according to all three of my dogs. Much healthier than the ‘green dental treats.’ I can now feel good about giving them their after-dinner treat! I know we’ll be ordering again soon”

~Laurie Previtali, Connecticut

5 RAINY-DAY GAMES FOR YOU & YOUR DOG

1. Hide & Seek

This classic game is excellent for practicing your pup's waiting skills, as well as teaching them to search. Plus, seeing them get excited every time they find you is a great perk for your rainy day.

2. Shell Game

The Shell Game is perfect for your mutt's mental stimulation. Take two opaque cups and turn them over. With your dog watching, place a treat under a cup. Give your dog the cue to come turn over the cup and get the treat. Do this a handful of times, letting your dog really understand the game. Then, alternate which cup you place the treat under. When your dog selects the correct cup, let him have the treat. If (and when)

he doesn't select the correct cup, show him the treat under the correct cup but don't let him have it.

If your dog masters this, it's time to challenge him even more. Place a treat under the left cup, and then slide the cups to switch places, so that the cup with the treat is now on your right. Amp up the game by adding more cups.

3. 52-Toy Pickup

Start with the "drop it" command. Getting your dog to drop on command is essential for this cleanup game.

Start training your dog to drop toys in a basket or box. Treat the stages of the behavior a little at a time, such as whenever your dog heads toward the basket with the toy, or dropping the toy near the basket. Eventually, your dog will understand that a command like "put away" means to drop the toys back in the basket.

After this part is mastered, build up the number of toys your dog picks up. Start with rewarding your dog each time he puts a toy away. Then reward him only after he

puts away two toys, then only after three toys and so on. Eventually, the reward will only come when every toy is put away, and a command like "clean up" will have your dog running around the room finding every toy as quickly as they can to win the big jackpot of treats.

4. Go Find It

Similar to Hide-and-Seek, Go Find is for searching for a treat, as opposed to searching for you. This game is great for learning self-control and the "wait" command, as your pup is stuck in the sit position while you hide treats in a variety of places. Once you say "go" he will run around to get them all.

5. Teach your furry friend a new trick!

If your pet has already mastered "speak", "lay down" and "roll over", add to their performance list with tricks such as standing on their hind legs, jumping through a hoop, playing dead, or bringing their leash to you.

The Perfect Treat for Games on Rainy Days

Dogs love games with tasty rewards, like **Springtime's Dog Cookies**. Our line of healthy, natural cookies are smokehouse dried with premium ingredients for tantalizing taste. These savory meat-filled cookies are made in the USA with food-grade, USDA-inspected ingredients, with no fillers, by-products, dyes, chemicals, additives, or preservatives. They come in two varieties: **Beef Liver & Coconut Cookies** and **Duck Cookies**.

Garlic Capsules for People

Garlic is a natural way to support immune health and deter biting insects.*

**SPECIAL OFFER
SAVE 20%**

“Odorless garlic” is an oxymoron, kind of like “jumbo shrimp.” **Springtime Garlic Capsules** are definitely not odorless. When you open the jar and sniff, you will be impressed. However, if you take them at mealtime, you probably won’t get garlic breath. For best results, please take daily.

- Supports and boosts the functions of the immune system*
- Regular daily use helps deter biting insects
- One of the world’s most powerful antioxidant foods
- Promotes friendly bacteria in the digestive tract*
- Provides cardiovascular health support & helps maintain healthy cholesterol*

SPRINGTIME

Spirulina Tablets for People

Spirulina is a nutritious blue-green microalgae renowned for supporting healthy liver and kidney function.*

**BUY TWO
GET ONE FREE
SAVE 33%**

The most widely used word to describe spirulina is "super supplement." Here's why: Spirulina contains a higher percentage of protein than meat, the highest whole food source of vitamin B12, more iron than beef liver, 25 times more beta carotene than carrots, more chlorophyll than alfalfa or wheat grass, and three times more omega 6 than evening primrose oil.

PRODUCT HIGHLIGHTS

- Supports healthy endocrine, immune, and nervous system function*
- Helps maintain healthy liver & kidney function*
- Great source of protein, helps satiate the appetite

SPRINGTIME

"...nothing helped like Spirulina Tablets has!"

Dear Springtime:

I have been a customer for a while now using your products for my dog and myself. I just wanted you to know that I had been suffering tremendously from foot issues, and nothing has worked!

I decided to start taking

Spirulina Tablets again, and

I noticed I was able to maintain a normal inflammatory response. After three days I started not only feeling better but my feet were back to normal!

Believe me I tried all the tricks, and nothing helped like **Spirulina Tablets** has!

Thank you,

Bridget Ripley, Texas

CoQ10 for People

Concentrated in the heart, CoQ10 (coenzyme Q10) is produced by the body to support heart function. Springtime CoQ10 helps support normal CoQ10 levels as you age.*

Coenzyme Q10 (CoQ10) is also called ubiquinone because it is so widespread (ubiquitous) in the body. Although it is naturally produced by the body and concentrated in the heart, CoQ10 can be supplemented to support healthy heart function.

- Supports normal heart function*
- Helps maintain healthy energy levels*
- Perfectly complementary to **Tonic Blend**

SUPPLEMENT FACTS (PER SOFTGEL)	
Coenzyme Q10 (ubiquinone)	100 mg
Other ingredients: rice bran oil, gelatin, glycerin, purified water, beeswax, and titanium dioxide.	

Suggested Daily Use:

- Good:** One softgel daily
- Better:** Two softgels daily
- Best:** Three softgels daily

CoQ10: Proven for Heart Health

The following evidence summaries were published about CoQ10 by the Mayo Clinic, one of the best research hospitals in the world.

On CoQ10 Deficiency...

“CoQ10 is made naturally in the body, but deficiency may occur due to disease, low dietary intake, or high CoQ10 use by the body. Symptoms of deficiency include heart failure, high blood pressure, and chest pain. Depending on the cause of deficiency, supplementing with CoQ10 or increasing dietary intake may be effective.”

On CoQ10 for heart failure...

“Early evidence suggests that CoQ10 may be effective for chronic heart failure. Low blood levels of CoQ10 have been associated with this condition. CoQ10 has been used in combination with other herbs and supplements for chronic heart failure.”

On CoQ10 for high blood pressure

“There is good evidence to support the use of CoQ10 in the treatment of high blood pressure. However, more studies evaluating a higher dose for a longer treatment period are needed.”

Coenzyme Q10. Evidence. <http://www.mayoclinic.org/drugs-supplements/coenzyme-q10/evidence/hrb-20059019>

Boswellia Extract for People

A natural herbal supplement that supports a healthy inflammation response, such as one might normally experience after rigorous activity or with healthy aging.*

Boswellia Extract is one of the most useful and effective herbal products in the world. Our high-grade extract contains almost 10 times of the active compounds found in the raw sap of the *Boswellia serrata* tree. Benefits accrue with daily use.

- Supports the healthy inflammation response, such as one might normally experience after rigorous activity or with healthy aging.*
- Herbal support for comfort*
- Helps maintain healthy joints*

SUPPLEMENT FACTS (PER TABLET)

Boswellia serrata extract, 60% 500 mg

Other Ingredients: dicalcium phosphate, microcrystalline cellulose, croscarmellose sodium, stearic acid, magnesium stearate, silica and film coat (hypromellose, hydroxypropyl methylcellulose, and polyethylene glycol).

Suggested Daily Use: Suggested Daily Use: 1–4 tablets taken 1–3 times a day with meals according to personal need. Please note: Consult your healthcare professional before taking this product if you are pregnant or nursing.

"...I enjoy my life again!"

Dear Springtime:

I have inflammatory issues. I would wake up in the middle of the night, and try to manage the household uncomfortably. My social life was at a standstill. At Christmas time, I tried **Boswellia Extract** tablets. I can't believe the difference in my life. I can actually go out and shop in a store, instead of being stuck in the house. My inflammatory response is maintained at a normal level, and I enjoy my life again!

I can now get up at my leisure without any issues, take care of my home in moderation, and feel so good again! Thank you, **Springtime!**

Ahiflower® Oil Softgels for People

Ahiflower Oil is the richest, most effective source of omega-3 and omega-6 fatty acids from a single non-GMO plant.

Ahiflower Oil (*Buglossoides arvensis* seed oil) is a nutritional supplement that delivers a unique and unparalleled combination of essential omega 3, 6, and 9 fatty acids, essential for health, vitality and wellness.

- Omega-3 and omega-6 powerhouse: Contains stearidonic acid (SDA), alpha-linolenic acid (ALA) & gamma-linolenic acid (GLA)
- More combined essential fatty acids than flax, chia, hemp, sacha inchi, perilla, or echium seed oils
- Up to 4 times better EPA conversion than flaxseed oil
- All the omega benefits without depleting marine fisheries and ecosystems (and no fish burps)
- Highest naturally occurring SDA
- Good source of GLA – about two-thirds that of evening primrose
- Vegan and non-GMO

The Benefits of Ahiflower

Natural, sustainable, traceable

Ahiflower is a traditional wild plant now being cultivated to demanding standards of sustainability and is fully traceable to deliver all your essential, daily omega needs.

Omega-3 SDA: A game changer

Ahiflower has unmatched natural stearidonic acid (SDA) content, not available in flax or chia oils, making it the richest, most effective combined omega-3+6 source from a non-GMO plant.

Better than flax. Not from fish

Superior omega-3 EPA vs. flaxseed oil. A human clinical trial showed that Ahiflower oil is 300-400% more effective than flaxseed oil. Flaxseed and chia oils are rich in ALA with no SDA, resulting in lower EPA conversion rates. No fish taste or odor.

Removing the pressure from fish populations

Increased demand for omega-3 fatty acids for both human nutrition and aquaculture contribute to the long-range decline of anchovy and sardine fisheries. Ahiflower provides a non-marine omega 3, 6, and 9 fatty acid source that can be scaled sustainably and affordably.

NEW!

Astaxanthin for People

One of nature's strongest antioxidants providing powerful defense from free radicals.

Astaxanthin is a reddish pigment that belongs to a group called carotenoids. It is found naturally in certain algae and is what gives shrimp, salmon, and other seafood their pink/red color. Oxidative stress causes damage to the cells, proteins, and DNA in your body. **Astaxanthin** is one of the world's strongest antioxidants in free radical scavenging by 20x – 60x! It provides a unique and powerful defense from free radical damage to the brain, nervous system, and eyes due to its stability to cross the blood-brain and blood-retinal barrier.

- Helps the body maintain peak performance; increased endurance, energy, and strength*
- Supports the body in recovery from exercise*
- Supports cardiovascular function and a healthy circulatory system*
- Supports skin structure, enhancing moisture levels and elasticity*
- Supports skin health during UV and sun exposure*
- Helps support a healthy immune response*

"I began ordering the Joint Health Capsules for myself."

Elena riding Bliss!

Dear Springtime:

I have been a customer of Springtime for almost ten years. First, I started out buying supplements for my horse. Then, when I became concerned about the health of my knees, I began ordering the **Joint Health Capsules** for myself. The doctor who saw my x-ray results told me to keep taking it, because he noticed an enhancement in my joint health.

Thank you,
Elena Kavall, Connecticut

I do triathlons, and I'm getting noticeable results with **Tonic Blend**. I've seen a clear difference in terms of my performance and my recovery time since I started using **Tonic Blend**. Kudos!

John Searing, Virginia

* This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

TONIC BLEND INGREDIENT INFORMATION

A WORD ABOUT FREE RADICALS

One of **Tonic Blend**'s most important benefits is that it was designed to fight the irreversible effect of free radicals. Free radicals are atomic aberrations that can attack, damage, and even kill vital cell structures, which have negative impacts similar to advancing the aging process.

WHAT CAUSES FREE RADICALS?

Well, it's no secret that the quality of our air, vegetation, and water are degenerating with time. Our bodies, which normally can cleanse themselves of free radicals, as well as germs and viruses, are under increasing attack from the very lifestyles we live. Environmental pollutants, radiation, herbicides, alcohol, cigarette smoking, even sunlight and exercise can produce excess free radicals. In today's world our bodies need all the help they can get in staying healthy.

HOW DOES TONIC BLEND HELP?

Tonic Blend contains antioxidants which help trap and neutralize free radicals. Vitamins E & C, carotenoids, and minerals like selenium are among the full range of **Tonic Blend**'s antioxidants. In addition, **Tonic Blend**'s essential vitamins and minerals help aid in the quest for health. We may not be able to completely change our lifestyles, but with **Tonic Blend**'s help, we may be able to change our health for the better.

Reishi Mushroom Extract: 25 to 1 – A powerful adaptogen of Chinese origin, Reishi has been used for thousands of years to help people stay healthy amid a wide range of biological, environmental, psychological and chemical stresses.*

Eight mixed **bioflavonoids** along with the polyphenols help in maintaining elasticity of the blood vessels.*

Vitamin C is an essential nutrient used by the body for tissue repair, for neurotransmission between cells, and for the immune system. It is also a well known antioxidant.

Panax Ginseng Extract 20 to 1 concentrate – The premier Chinese herbal tonic. Ginseng gives excellent support for the central nervous system, including after periods of mental and nervous stress.*

Queen Bee Royal Jelly – freeze dried, a special bee's food produced for the queen, royal jelly is one of the world's most concentrated foods. Along with many unique nutrients, royal jelly is also extremely rich in B vitamins, especially pantothenic acid, which is supportive of adrenal function and resistance to fatigue.*

DMG (N,N-Dimethylglycine HCl) purified – DMG, sometimes called vitamin B15, has been shown in studies to support oxygen utilization and reduces lactic acid, caused by exercise. This promotes higher endurance and strength

as well as a lessening of post exercise fatigue and soreness.* DMG was discovered in Russia.

Borage Oil is a source of GLA, which supports prostaglandin formation. These short-lived hormone-like substances play a very important role in regulating functions of every organ in the body. In addition, our body's ability to form GLA decreases as we mature.

Gamma Oryzanol purified. An extract from brown rice, gamma oryzanol is a Japanese discovery that is popular among athletes.*

Ginkgo Biloba helps in better circulation of blood and transmission of oxygen to brain cells, which in turn improves memory and mental alertness.*

Chondroitin Sulfate, min. 90% pure – is produced by the body to create joint tissue and lubrication. Chondroitin sulfate can be taken as a supplement for support of healthy joints, cartilage, and synovial fluid viscosity.*

Grape Seed Extract – excellent antioxidant support. Scientific studies have shown that grape seed extract is 20 to 50 times stronger than vitamin E or C in fighting free radicals that attack the body.*

Hesperidin – noted in studies for its support of healthy circulation and supporting a healthy inflammation response, such as one might normally experience after rigorous activity or with healthy aging.*

SPRINGTIME'S TERMS AND CONDITIONS

60-DAY RETURN POLICY – If you are not happy with any product, simply return it within 60 days for a credit or refund. No questions asked. (Returns are subject to prorated refund). Shipping fees are non-refundable.

24-HOUR ORDERING – Please visit springtimeinc.com for secure online ordering, current specials and email sign-up, or you may call us toll free at 800-521-3212. If you call us after business hours, please feel free to leave your order on the answering service. If you prefer a real person, just leave your name and number and we'll call you back. Our office is open Monday through Friday, 8:30 a.m. to 5:00 p.m., Eastern Time.

\$8.00 GROUND SHIPPING PER ADDRESS FOR ORDERS UNDER \$75.00 – Orders under \$75.00 delivered to any street address in the lower 48 states for an \$8.00 flat fee. If shipping to multiple addresses, please add an additional \$8.00 per address. Shipping is FREE for orders \$75.00 and over (48 states).

Estimated FedEx Ground Delivery

SPRINGTIME'S STANDARD SHIPPING AND HANDLING

Ground Shipping Per Address to 48 States.

Springtime may choose a preferred shipper: *FedEx or UPS

TOTAL ORDER	SHIPPING/HANDLING CHARGES
Under \$75.00.....	\$8.00
\$75.00 & Up.....	FREE

***FedEx Home Delivery runs Tuesday through Saturday.**

This map illustrates service expectation schedules in business days for FedEx Ground shipments.

SAME DAY SHIPPING TO 48 STATES – 99% of orders received by 2:00 p.m. ET are shipped that day FedEx ground. Please note that FedEx & UPS require a "street address" and cannot deliver to a P.O. Box. Expedited shipping is available at an extra charge (please call for rates at 800-521-3212). If orders are placed during weekends or holidays, they will be shipped the next business day.

ALASKA, HAWAII, AND CANADA – Now accepting orders online to Alaska, Hawaii, and Canada via USPS. Discounted rates based on weight of the package. For shipments to other countries, please call our office at 800-521-3212 for rates.

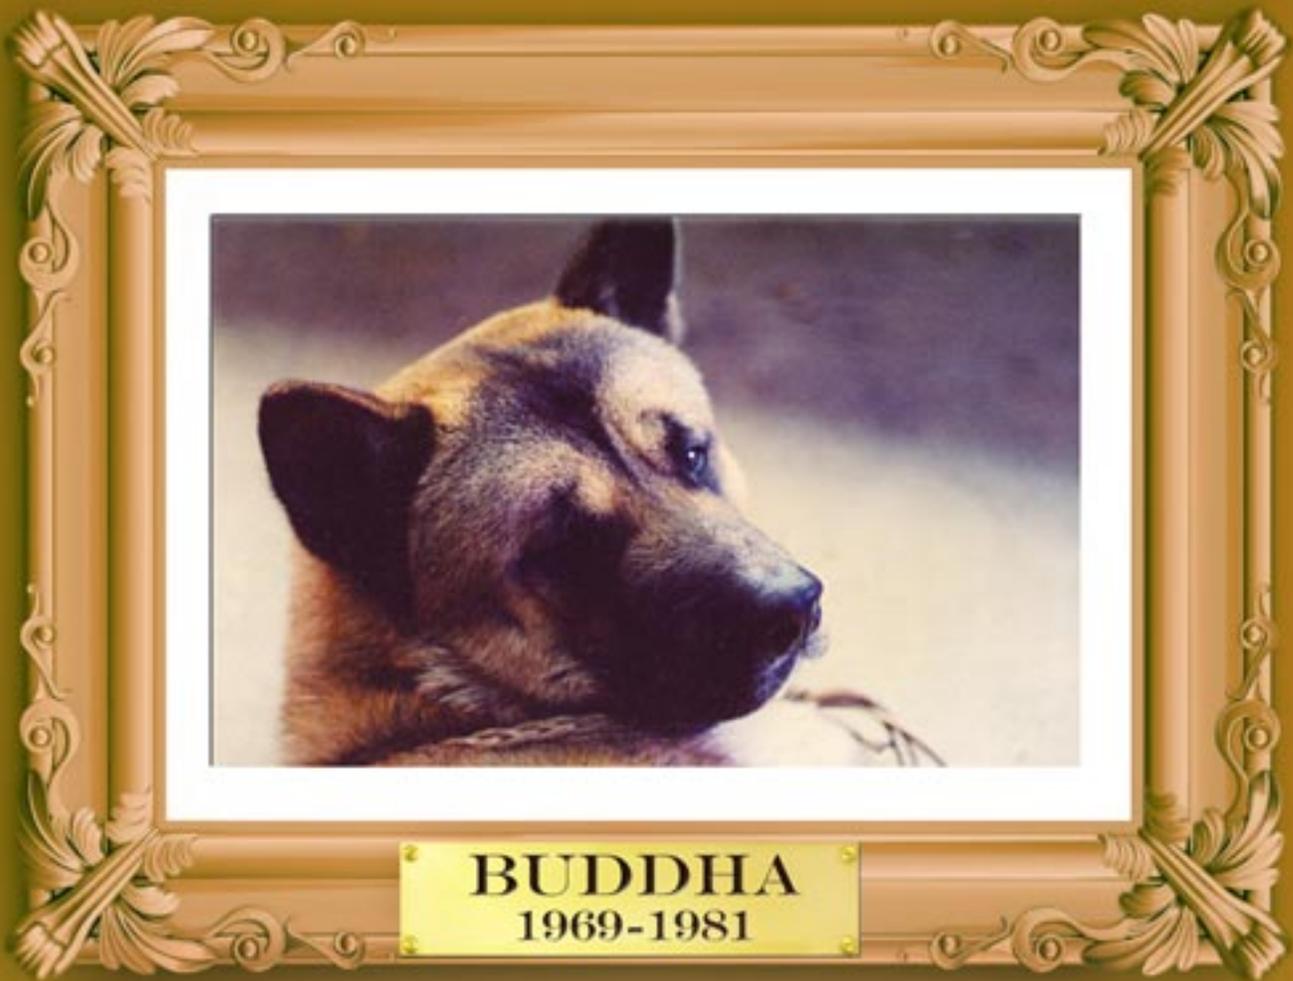

NO MINIMUM ORDER – No minimum order required to ship. Let us prove to you what thousands of customers already know – Springtime beats all competition for quality, service, and value.

The dog that started it all...

Springtime Supplements began with one man's heroic effort to save his dog.

Buddha, an Akita who belonged to our founder, Dennis Hampt, suffered a broken leg as a puppy. As he matured, the leg deteriorated and by the age of seven, Buddha had reached a point where two different vets recommended that he be put down.

Dennis loved Buddha dearly, and he was not willing to give up without a fight.

So Dennis dedicated himself to exhaustive research and experimentation with natural foods. It didn't take long before he began to see results. Not only did Buddha recover, but he regained the power and strength that he had in his prime. Buddha would go on to live another five active years.

That discovery became the foundation of Springtime Supplements and our most popular product: **Fresh Factors**. For 30 years, **Fresh Factors** has improved the health of countless dogs with a chewable supplement they love to eat. The success of **Fresh Factors** was followed by several other all supplements for dogs, horses, and people.

Since 1979, the Springtime mission has remained the same, with inspiration from Buddha: to help animals live naturally happier, healthier lives. As Dennis likes to say, "People who love animals gotta stick together."
